### Deception Continued.

The Patriot has abandoned its unique method of computing the Provincial debt but from time to time sneakes into its columns equally preposterous and misleading statements of the public rev enue, collected by the respective parties while holding office. In a recent issue, i undertakes, in a half-hearted manner, to show that the Conservatives collected more money directly from the people than the Liberals in a period of twelve years, respectively. But the way it goes about this is quite in keeping with its record; it is unfair, \$360,000 worth of work to the misleading, false. It tabulates what purports to be a correct statement of receipts by the Conservatives from certain them \$360,000 in remission of here and there, in its editoaial the fugitives on board, under the sources for twelve years, and taxes. Let the one go against columns five distinct para- names of Rev. John Robinson and then divides by twelve, giving a yearly average. But when it comes to present the Liberal side of the case it gives no twelve years statement-no average yearly amount; but simply takes one year, when the receipts from the sources Taxes collected by namedwere at their lowest, and puts this against the Land Office receipts 528,900.00 average struck in case of the Conservatives. Anyone with at once that that is a most number of years the Conservcontemptible and misleading atives were in power, we have method of argument. But \$50,925 as the average annual that is not the only dishonest income directly from the and misleading feature of the people; not \$80,924 as the Patriot would like to make it. Patriot's method of argument, as we shall presently show.
