

THE INVICTUS WATERPROOF SHOE Dry-Sox Process. CONTROLLED AND MANUFACTURED BY GEORGE A. SLATER INVICTUS SHOES

of GEO. A. SLATER fame—the "best good shoes" give the wearer all he wants and pays for in footwear. We have the exclusive agency of the handsome shoes. Come in and see our

New Stock which has just come to hand, especially our "Elk Hide" Waterproof Storm Boots.

# CHEAP Soleing

—AND—

# CHEAP Selling.

These two naturally go together.

With a thin "out-sole" and a thick "slip-tap," the cost of soleing can be reduced, since "out-soles" are worth more than "slip-taps."

But what happens?

The wearer soon finds these cheap-soled shoes are "cheap" in a sense that doesn't please.

## Subscription

### MRS. GOULD RELIEF FUND.

The Evening Telegram has opened a subscription list in favour of Mrs. Gould who is in such dire straits as set forth in yesterday's Telegram. Any amounts, however small, will be thankfully received and acknowledged through these columns. Remember, he gives twice who gives quickly.

J. Outerbridge ..... \$10.00  
Evening Telegram ..... 5.00

## Indignation at Bay of Islands.

We learn that recently one Patrick Brown, of Placentia, was sent to Bay of Islands, having been created a "Tide-water" to do duty for fall and winter months in that section. As a result the people of the place are highly indignant with the Government and they would like to know what Premier Morris means by foisting this individual upon them. If it were necessary to make such an appointment, there are many eligible young men at Bay of Islands who would be only too willing to undertake the work without the necessity of drawing on other districts to supply such officials. But there is another phase of the matter which shows great unfairness to the predominant denomination of the place. There are already from Humbermouth out to Lark Harbor (two Roman Catholic) and two Methodist sub-collectors, and the Church of England people have been left completely out in the cold. Their opposition to this latest appointment is certainly justifiable under the circumstances and they intend seeing the matter rectified. They are asking where their representative, Mr. Downey, is and why he doesn't interpose to obviate this unfairness. There is a "rod in pickle" for him when he next comes to seek the suffrages of the electorate, and he will feel it to his cost, as well as the Premier, his master. Mr. W. K. Morrissey is also at Bay of Islands doing special duty.

## A Wonderful Climb.

Percy H. Thorp crawled up Impossible Cliff for First Time. A wonderful feat of rock-climbing in the Grindelwald, Switzerland, has been accomplished by Mr. Percy H. Thorp. He succeeded in climbing up the face of the Eiger to the Eigerwald station of the Jungfrau Railway (a tunnel railway), and clambered in through the aperture by which travellers admire the view. This aperture is situated at a great height above the valley, and the rock wall reaching up to it is almost as steep and smooth as the side of a house. The feat has never been accomplished before.

## Magazine Writer Burnt to Death.

Los Angeles, Cal., Oct. 24.—Frank Hotelling, a magazine writer of New York, was burned to death early last night by a fire which destroyed a rooming-house in West 7th street where he was staying. The fire is supposed to have been started by an electric heating device in Hotelling's room. Hotelling left his room and then returned to rescue some manuscripts. Firemen found his charred body where he had fallen overcome by smoke.

## Football This Afternoon

The inter-collegiate football match which takes place on St. George's Field this afternoon promises to be a lively game. It will be between the Pelidians and Methodist College teams, and a large crowd of spectators are sure to be present. If the latter draw or are beaten the St. Bon's will hold the championship for this year.

F. S. A.—The programme which has been arranged for the Halloy E'en Entertainment in aid of the Field-Spencer Association is a most attractive one. Songs will be given by Mrs. Job, Miss Dorothy Johnson and P. M. Higgins. First a violin solo by Miss Sybil Johnson and a duet by Miss Withers and Mr. C. B. Chitt. The next item will be a one-act play, the scene of which is laid in France in the time of the Revolution and telling of the escape of three aristocrats from the Republicans. The cast in characters: Miss Withers, Miss Rendell, Miss Flora Chitt, Mr. C. B. Carlet, Mr. Cecil Chitt. After the concert a Partridge Supper will be served and Candy and Refreshments will be sold. Performance at 8 p.m., on Wednesday, Nov. 1st, in the British Hall. Admission 20 cents.—Oct. 30.

ARRESTS FALLEN OFF.—Since the police began visiting saloons the number of arrests for drunkenness have fallen off appreciably. The News believes 50 per cent. Of course there are two ways of interpreting the above.

Minnard's Liment Cures Colds, Etc.

## Clark-Urban Co.

### T. A. HALL PACKED LAST NIGHT.

The production of the drama "The Girl from Out Yonder" marked the greatest success which the Clark-Urban Co. has achieved since coming before the public of St. John's. When we set this play down yesterday as one of the best, if not the best, in the company's repertoire, we were not far astray. The hall was crowded almost to suffocation by an audience appreciative of the work of the company and gave them unstinted applause. The play is a pretty one and was staged well. The scenic effects, which were elaborate, added a touch of realism to the plot. Mr. Harden Clark had a role last night in which he starred. The portrayal of the hero generally falls to his lot, but last night he impersonated an altogether different character, that of an old man rendered infirm and decrepit because of being weighed down with the belief that he had been guilty of a murder which, however, the sequel showed, had been the act of another. Mr. Clark's versatility is surprising and his delineation of the role was fine. Frank Urban is a comedian of merit and the role of "Ben Cook" always playing jacksons or proposing to the spinster "Simonson" suited him and he kept the house laughing at his every appearance. Fred Schreiber did some very clever work. The character he impersonated was that of a civil engineer of high attainments, and the successful wooer of "Flotsam," a role which Miss Cecil took with credit to herself and pleasure to her audience. The play was one which called for emotional acting and the company proved themselves to be equal to the occasion. Some very emotional acting was witnessed in the third act as the part of Mr. Clark and Miss Cecil, before the former goes to prison, and where he prays with the girl for forgiveness for the crime which he feared to confess. All the members of the combine were in good form, Grace Leith being particularly effective as the spinster who makes up to "Ben Cook" while Billy Webb, LeRoy Kenneth and the other ladies and gents sustained their respective roles to the delight of all present. It is safe to say that the performance was one of

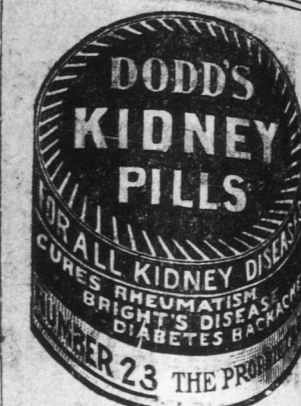

the best ever witnessed in St. John's. The specialties were of a very entertaining order. Some new features were introduced and were highly entertaining. The Schrieber brothers' musical innovations were delightful, while Marie Hodgkin's singing, Roberto's tight wire walking and Grace Leith's funny impersonation of the old maid kept the audience heartily laughing.

The new offices of the agents of the Furness Line in this city, and which are located over the Royal Bank of Canada, will open for business to-morrow. Mr. Alexander Montgomery is the new local agent. Messrs. J. & W. Pitts had the agency for over 15 years, and the officials of his office, especially Mr. Frazer, were always obliging to the press and public. We believe the officials of the new offices will act similarly.

## The last performance of "In The Bishop's Carriage."

## Nine Deaths in Mine Explosion.

Harrisburg, Ills., Oct. 23.—Nine men were killed, ten gravely wounded and 15 more were imprisoned by a cave-in as a result of the explosion of a keg of powder which ignited black damp to-day in O'Gara mine No. 2, a mile south of here. That more lives were not lost was due to the fact that the shift was changing when the explosion occurred. Two men were instantly killed and seven others, sent to the surface, died within an hour. The detonation of the explosion warned the town that an accident had occurred and the fears of the wives and children of the miners were confirmed when they

Most of the miners employed by the O'Gara Coal Mining Company of Chicago, are Americans. The mine is one of several owned in the field near here by the company.

## Marine Notes.

BANKERS DO WELL.—The banking schooner Huron, Capt. W. Martin, did well this season, securing about 2,000 qts. of fish. Yesterday her crew of 20 men were paid off at the office of the bank, each man sharing \$100.

## Harbor Grace Notes.

We regret to hear of the death at Boston of Mr. William Gordon, son of the late John Gordon. Mr. Gordon visited this his native town about four years ago, mostly to see his mother who had reached an advanced age, and who died last year aged over 90 years. Mr. Gordon leaves to mourn his death a widow, four sons and one daughter.

A young gentleman of the West End and a young and equally well-known young lady of the East End were married on Friday night last. They expect to leave shortly for the United States where both have relatives. We wish the young couple much happiness. Their friends will do the same when the names of the parties are made known.

Several cases of scarlet fever, lately developed here, and the houses of the parties afflicted with it were promptly placarded.

The Exhibition opens at 2.30 to-morrow, and the President, Secretary, and other members of the Agricultural Society besides a number of helpers are busily engaged getting everything placed to the best advantage. Quite a fine display will no doubt be made.

It was rather unfortunate that the Reid Nhd. Co. could not secure a larger steamer than the Stella Maria to make the trip to Labrador in place of the Solway. Quite a large amount of freight was to have been brought down, but the little boat was so filled up that very little could be taken here.

Mr. H. H. Archibald's new potato digger arrived by train on Saturday. It will, no doubt, be very interesting to see this machine in operation.

Miss Elsie Wareham arrived from Haysack, Placentia Bay, on Saturday on a few days visit to her sister, Mrs. W. A. McKay. Miss Wareham leaves next week for Montreal where she will reside for a year or two.

Mrs. John Heaver who had been at the Hospital, St. John's, for treatment returned by train on Saturday much improved by the treatment received at that institution.

## CORRESPONDENT.

Harbor Grace, October 30, 1911.

Shea & Co. had a wireless from the Mongolian saying that at 10 o'clock this morning she was 129 miles east of St. John's and is due at 4 p.m.

## SECURED PROMPT RELIEF

From Severe Neuralgia of Eight Years Standing.

Mr. James Tait, of Westmeath, Ont., writes: "I have been a dreadful sufferer for the past eight years. The doctors said I had neuralgia of the muscles of my back; the pain was so great it would draw me all up. I tried different doctors, but could find no cure until I used Egyptian Liniment, which was highly recommended by Mr. Fraser, of this place. It had the desired effect, and I secured prompt relief, and have had no relapse in over 15 months. I only used one bottle, and can now load my own produce, pressed hay, etc., myself. Egyptian Liniment has made my old days brighter, and I trust others may be benefited through the publication of this letter."

You will find it splendid for rheumatism, sciatica, and all bruises, sprains, burns and frost-bites. 25c at all druggists. Free sample on request.—Douglas & Co., Napassee, Ont.

## Fisherman Overboard.

At 6.30 p.m. yesterday as a fisherman named Dwyer was "trying" to board the schr. Erik, at Bowring's wharf, he tripped in some object and went overboard and went almost to bottom. On coming to the surface he cried loudly for help and attracted the attention of watchman Jerry Collins who jumped into a boat and with the aid of other men from crafts about rescued the man, who had taken in considerable water, and when taken upon the wharf was in a bad way. The man lost a bottle of liquor which he had in his pocket and also, he claims, the sum of \$16. Had it been later the man might have been drowned.

## 108 Nox a Cold in One Day

The greatest Cough Medicine ever offered to the public. Every bottle is guaranteed. Absolutely harmless. 25 cents a bottle. Sold by McMurdo & Co.

## Wild Dogs About.

Incidents of Portugal Cove Road, who left that place some years ago for other localities left a race of dogs after them which have propagated others, and these now roam the woods and are wild and vicious. Yesterday John Butler, who is a servant with William Hall, was attacked by these brutes and had his hand badly lacerated. One of them drove its teeth right through the member which was also badly torn, and the man was compelled to go to a doctor and have the wound cauterized. These brutes should be exterminated.

## A Complaint.

"One Who Knows" complains of a man giving money to two little girls, aged 4 and 5 years, and enticing them down a lane. She states that the man left the girls when a gentleman passed by. We would suggest if the parents consider they have ground for complaint, they should make the complaint direct to the police.

## The Governor is Due To-Night.

Hon. R. Watson had a Marconigram from the Governor this morning, who is on board the S. S. Carthaginian coming to this port. His Excellency informed the Colonial Secretary that the Mongolian (would be) due about 10 o'clock to-night, and that he would land immediately the steamer arrived.

## Made Good Wages.

There was an excellent fishery the last summer at the Grosit Islands, and good fares were taken. A man named Tobin, formerly of Trepassay, who settled there secured 200 qts. of cod which was splendidly cured. He received from \$6.60 to \$6.80 per qt., according to grade. He made \$350 for his own share, and the men who were with him cleared \$250.

MINNARD'S LIMENT CURES DISTEMPER.

## Rae Island Farm.

At a meeting of the Governors of the Nhd. Savings Bank held yesterday morning it was decided to withdraw the notice of the sale of Rae Island Farm. Those present were Rt. Hon. the Premier, Hon. J. B. Ayre, Hon. J. Harris, Hon. Dr. Sketton, Hon. W. R. Warren, K.C., J. R. Bennett, M. H. A., M. J. Kennedy, M. H. A. and R. A. Squires, M. H. A. It is likely that the property will be retained as a site for a public building or a public park.

Tenders were asked for on September 14th and for six weeks or so, noticed calling for them appeared in the city papers; the last insertion being yesterday morning. As the tenders were to be in by November 1st, it is clear that the determination to reverse the decision was arrived at almost on the eve of the day on which the tenders were to be opened. The letters which appeared in the Evening Telegram evidently had the desired effect and the property will not be sold as was originally intended, but will be utilized for some public purpose as was suggested by two of our correspondents.

## McMurdo's Store News.

TUESDAY, Oct. 31, 1911. The considerable change in temperature which is daily felt between early morning and noon, and again between noon and evening, makes the opportunity for catching cold pretty frequent. One of the easiest ways to prevent throat colds is by the use of Fine Tree Lozenges. One or two lozenges placed in the mouth in the morning or evening will prevent the low temperature from causing you trouble. You should have a tin in your pocket. Price 25c.

## Personal.

Miss Christabel Ryall, daughter of Mr. Samuel Ryall, of Anderson's, who was attending the classes at the Convent of the Presentation Order, entered Littlefield Academy, Sunday, to complete her studies there.

## Chafed and Aching Feet

Make walking a misery to many who do not know of Dr. Chase's Ointment.

How far can you walk without suffering in one way or another from discomfort to your feet?

This ointment also affords relief and cure for chilblains and frost bites. Whenever there is itching of the skin or a sore that refuses to heal you can use Dr. Chase's Ointment with most satisfactory results. 50 cts. a box; at all dealers, or Edmanston, Bates & Co., Toronto.

# P. F. COLLINS,

The Store of Satisfaction, 346, 342, 344 Water Street.

Its issue in li and slender volum is a novel feature the new Encyclopa Britannica (11th ed published by the Cambridge Univers Press.

## A DRAWBACK SURMOUNTED

The great drawback to the Encyclopa Britannica in the past has been its size: volume weighed nearly 7 lbs. and measured 3 inches in thickness. Two hands were not to take it from its shelf, and it could be only at a table or desk. In too many instances therefore, the Encyclopa Britannica seldom opened, was regarded solely as a reference, to which recourse was had in the last resort. Thus its size openly conflicted with the purpose which its editors, the beginning, had kept consistently before them, namely, the preparation of a book intended, not only for reference, and for stand reference, but also for reading.

## THE EMPLOYMENT OF INDIA PA

But how was the drawback of cumbersome to be avoided in the production of a book over 40 million words? There was, in truth, solution of the problem. It was recognized employment of India paper would at once reduce bulk by two-thirds. The Cambridge University had long been famous for its India paper Bible the idea of using India paper in the production of containing 27,000 quarto pages was too revolting to find immediate acceptance—how revolutions were judged from the fact that the normal output of India paper in England for a whole year would not printing of only some 5,000 or 6,000 copies of new Encyclopa Britannica. Experiments, it did not bring out the advantages of India paper, publishers of the new Encyclopa Britannica that, from the point of view of its usefulness, popularity, this purely material change is a cost scarcely less important than the recent change of its information and the systematic manner in which this information is presented. For the practical of an encyclopaedia depends upon the extent to it is used, and for once that the old cumbersome Encyclopa Britannica was opened and read, the new volumes will be used a hundred times.

## 20 INCHES AGAINST 7 FEET.

The illustration which accompanies this announcement is reproduced from an actual photograph, presenting the new (11th) edition standing in front of the previous (10th) edition. To those who are acquainted with the 10th edition it will seem scarcely credible that the 29 slender volumes here shown in the foreground are indeed the equivalent of the 35 old volumes which stand behind them. As a matter of fact, they cover over two million words more, and the reduction has been achieved without any diminution in the type. Each of the old volumes, containing 800 pages, measured nearly 3 inches in thickness, weighed close upon 7 lbs. The new volumes cost 900-1,000 pages each, but in the India paper impression each is slightly less than 1 inch in thickness and weigh only 3 lbs. The old volumes made a row over 70 inches wide and weighed 240 lbs. The new volumes occupy a width of 28 inches and weigh 80 lbs.

## A BOOK TO BE READ WITH CONFIDENCE.

It is easier to take an India paper volume of new edition from its shelf with thumb and forefinger than it was to lift one of the old volumes in two hands, whereas the reader of an old volume had to sit at a table, the new India volume is light enough to hold in one hand, while the reader sits back at his ease. The reader, indeed, the thin India paper volume offers another convenience besides that of its lightness, namely, flexibility. The ordinary paper book, bound in boards with a stiff back, is ruined if it is doubled back to cover, and a quarto volume, however light, is inconveniently large when held open. Indian paper, on the other hand, lends itself to flexible covers and is conveniently large when held open. India paper, of the new Encyclopa Britannica is thus able to end it double, back to back, so that the quarto book makes a handful no larger than an ordinary octavo volume of magazine when it is held open.

## SPECIMEN PAGES PRINTED ON INDIA PAPER.

Nor will the reader, upon nearer acquaintance, find any reason to discount the evident conveniences of India paper. For the wonderful characteristic of this material is that with extreme thinness it combines an extraordinary degree of opacity—thus the print does not show through from one page to another. More over, India paper, made almost exclusively of rag, and slaked with a hard surface, absorbs the ink less than ordinary book paper, and thus yields a very sharp impression from type and illustrations. On these points the reader may judge for himself, since the specimen pages accompanying the prospectus for which he is invited to read are printed upon India paper.
