Great Vandeville Treat at the Crescent

WONDERFUL TRIO OF JUVENILE PERFORMERS.

Commencing to-day the Crescent Theatre offers to the amusement-loving public one of the strongest variety entertainments ever witnessed in a local theatre. The first attraction is the Vandeville boy wonder, Pat Harrington, who will be heard in songs, songs that have gained fame on the Keith and other vaudeville circuits. "Pat" is a versatile comedian and his jokes are original—hear him sing tonight "That Old Irish Mother of Mine." It's a knockout! He's a great little man and as a comedian he is in a class all to himself. The second attraction is the popular juvenile accompanist Al Pittman, whose reputation as an accomplished pianist. Thirdly we have Mr. Jack Cronan, the skilled manipulator of the Traps, Drums and Tompkins, whose wonderful touch to a vaudeville bill adds the jazzy effect and greatly enhances the entertainment value. Here is a trio of juvenile artists that are certainly hard to duplicate.

Of course there is also a programme of motion pictures and the attraction to-night is the Murray's big photoplay, "Broadway Rom."

Surf Prevents

Cable Landing.

Transatlantic Telegraph at Far Rockaway.

New York, Aug. 25.—Heavy surf hindered the landing of the new transatlantic cable of the Postal Telegraph-Commercial Cable Company at Far Rockaway. After two hours' work it was decided to postpone the joining of the cable to the cable station, situated a few hundred yards inland, until the sea subsided. The new cable is claimed to be the longest and fastest deep-sea cable ever manufactured, and is the first new transatlantic communication put down since 1915. The total cost is \$15,000,000.

Clarence H. Mackay, president of the Commercial Cable Company, who witnessed the work said:

"This witnesses the first development in a program of expansion which our companies have undertaken. As part of this program the Commercial Cable Company's cable ship John W. Mackay is now taking on board at London a 200-mile cable to be laid between Waterford, Ireland, and Weston, England, to improve existing facilities between New York and London."

The Faraday, now on her maiden voyage, left Far Rockaway for Canada, N.S., to lay the Far Rockaway section of the cable. Its length is about 1000 miles. The cable ship Colombia, the largest of her kind in the world, is now on her way to Canada, where she will commence to lay another section of the new cable, about 1700 miles in length, from Canada to the Azores Islands.

The new cable has the largest copper conductor that has ever been put in a long distance submarine cable, and, in consequence, its message-carrying capacity far exceeds that of any other cable of similar length ever manufactured.

TRY IT!

Hundreds have found relief for Aches, Pains, Bruises and Cuts in Minutes.

Happy Accident.

To the upsetting of a tool-chest we are indebted for carb-tron cement, and the accident of a child playing with a bottomless oil flask which his brother, a Swiss mechanic called Arrand, placed idly over the frame of his rude oil lamp, gave birth to the lamp-chimney.

A glass cutter let some aquafortis drop on his spectacles, and etching on glass was the result. Howe's sight of his wife darning, with the eye of the needle first, gave him the root idea of his sewing machine, and the scholarly aid of Bessemer immediately suggested an improvement in the process of steel manufacture which doubled its efficiency, a missing link which had baffled the most skillful men in the business.

The system of coupling signals and working them all from one point with a single actuator was the thought of a lacy postman, who hated to move. It was the burning of a starch factory which introduced to the world a cheap rum, and it was the commission of a workman to put size into the paper he was making which produced the very first blotting paper.

Make a day for "dear old Dad" Kearney's made it Sept. 8th.
