DESERTED, THEN LOSES REASON

Sad Case of a London Woman in New York City—Now in Insane Pavilion.

A dispatch from New York to The Advertiser says:
The Tribune this morning says: Mrs. Frank Russell Dale, 20 years old, has been taken to a hospital from an up-town hotel suffering from melancholia. She came to the hotel two months ago with her husband from London. On several days later her husband disappeared. Mrs. Dale then obtained a place as proofreader on a daily paper, and wrote stories for Sunday newspapers. She was able to pay something on her hotel bill, and sent money to the governess in Florida, who was taking care of her child there. Three weeks ago the hotel manager learned of Mrs. Dale's situation. He told her not to distress herself about her indebtedness, and that she could remain at the hotel and pay when able to do so.
Recently, the bell boy, on going to Mrs. Dale's room, found her acting strangely, and the hotel physician diagnosed her case as melancholia, caused by lack of nutrition. She was under the delusion that it was raining in her room, and was discovered fondling the bedclothes, thinking she was caressing her child. It was learned that she had ordered from the hotel in the last three weeks barely enough food to keep her alive. At the hospital Mrs. Dale was placed in the insane pavilion, and it was said she would recover with proper care.
Inquiry was made here today, but nothing could be learned regarding the family.

RECTOR OF ST. LUKE'S.
Ashburnham, Ontario, Testifies to the Good Qualities of Chamberlain's Cough Remedy.
Ashburnham, Ont., April 18, 1903.—I think it is only right that I should tell you what a wonderful effect Chamberlain's Cough Remedy has produced. The day before yesterday, I was afflicted with a cold and cough that I did not think to be able to take any duties the next day, as my voice was almost choked by the cough. The same day I received an order from you for a bottle of your cough remedy. I at once procured a sample bottle, and took about three doses of the medicine. To my great relief the cough and cold had completely disappeared, and I was able to preach three times on Easter Day. I know that this rapid and effective cure was due to your Cough Remedy. I make this testimonial without solicitation, being thankful to have found such a God-sent remedy. Respectfully yours, E. A. LANGFILL, M.A., Rector of St. Luke's Church, To Chamberlain Medicine Company.

This remedy is for sale by all druggists.
Spend half an hour reading some book or article of real worth, studying a fine picture, or listening to some good music.
"Not if It Cost Ten Dollars"
A bottle would I be without Poison's Nervine," writes J. A. Butch, a farmer living near Trenton, Ont. "Nervine is the best household liniment I know. We use it for stomach troubles, indigestion, headache and neuralgia. I know of nothing better to take in hot water to break up a cold, or to rub on for rheumatism or neuralgia." Every farmer should keep a few bottles of Nervine handy and have smaller doctor bills. Large bottles 25 cents at druggists.
Too much corn juice is apt to make a man's voice husky.
SOME PERSONS are more susceptible to colds than others, contracting derangements of the pulmonary organs from the slightest causes. These should always have at hand a bottle of Bickel's Anti-Consumptive Syrup, the present day sovereign remedy for coughs, catarrh and inflammation of the lungs. It will effect a cure, no matter how severe the cold may be. You cannot afford to be without a remedy like Bickel's, for it is the best.

CRESOLENE IS A BOON TO ASTHMATICS
CRESOLENE is a long established and standard remedy for the disease indicated. It cures because the air medium is carried over the diseased surfaces of the bronchial tubes with every breath, giving prolonged and constant treatment. There is a complete tendency to relieve from chronic bronchitis, and immediate relief from cough or inflamed conditions of the throat. Descriptive booklet free.

CRESOLENE
Involved in the mouth are effective and safe for relief of the throat.

SOME CHANGES IN THE MILITIA ACT

Important Amendments to the New Government Bill.

PERMANENT FORCE FOR RIOTS

Militia to Be Used Only When Regular Force Cannot Be Had—Other Changes.

Ottawa, April 18.—There will be a number of important amendments to the militia act when it reaches the committee stage. Four clauses, 9 to 12, inclusive, are to be struck out. These are the clauses which impose penalties for sketching military works without authority, trespassing on military works and improperly disclosing information. The offences will be dealt with in the criminal code.
Members of the naval militia and members of the police force and fire brigades in incorporated cities, towns and villages will be added to the list of persons exempt from service.
That section of the act which enables 12 to 18 years liable for cadet drill will be abolished. The Governor-in-Council and not the Governor-General, as in the bill, is to have the power to subdivide military districts.
The oath of a militia man is to be changed. Instead of swearing to "well and truly serve the sovereign lord the King, his heirs and successors and to resist his majesty's enemies," etc., it is to be "I do solemnly promise and swear (or solemnly declare) that I will bear true allegiance to his majesty."
Only one son belonging to the same family residing in the same house can be drafted, unless the militia roll does not show enough men to complete the required proportion of service men.
The regulation to the commanding officer for troops to quell riots shall be issued by three justices of the peace, of whom the warden, mayor or other head of the municipality shall be one, "unless he has been previously pleased to act," which fact shall in that case be set forth in the requisition and shall not be open to dispute by the officer upon whom the requisition is made.
The militia is to be utilized only on such occasions as the permanent force cannot be had.
The section which refers to the appointment of a Canadian to the command of the militia has also been re-drafted. It was provided that he may be appointed an officer who shall hold rank not below that of colonel in the militia or in his majesty's regular army, who may be subject to the regulations and under the direction of the minister charged with the military command or inspection of the militia, and shall be paid at such rate, not exceeding \$6,000 per annum, as may be prescribed. The duties and authority of such officer shall be defined by the Governor-in-Council.
The regulation of uniforms and equipment for duty is to be abolished.
The militia is to be called out for annual drill by the Governor-in-Council, instead of by his majesty.
The allowance of a dollar a day each for horses is added to the provision for pay.
The bill contained a provision that "in the case of officers, when exercising any of the powers, functions, command or privileges of their military rank, the commanding officer for the time being, and also the adjutant or acting adjutant, shall at all times be subject to military law." It is now proposed to do away with this. A suggested new clause is that "in time of war, when the militia is called out for active service, to serve conjointly with his majesty's regular forces, his majesty may place in command thereof a senior general officer of his majesty's regular army." Members of the permanent force and of the permanent staff are at all times under military law, and the maximum penalty for an officer refusing to turn out to riot duty is increased from \$20 to \$100.
It is proposed to vest the property of every corps in the crown, instead of in the commanding officer.
It is also proposed that militia orders issued by officers in places where there are no newspapers shall be posted up "in the most conspicuous place of 'on the door of every place of public worship.'"
The clause empowering the Government to remit penalties incurred under the act is to be struck out, and a clause added to the bill that it shall come into force on a day to be fixed by the proclamation of the Governor-General.

KING EDWARD AND THE CODFISH
A Combination That May Bring Newfoundland Into Confederation.

Halifax, N. S., April 19.—Judge Provost, of St. John's, Nfld., who is the acknowledged authority on the French shore difficulty in Newfoundland, has written for the Chronicle a review of the settlement between Britain and France, in the course of which he says: "Two very divergent courses have been brought about this happy consummation—King Edward and the codfish. The sovereign's popularity in France, his consummate tact and good judgment have been the present 'entente cordiale' between the two nations. The erratic cod and the versatile lobster have wandered from the treaty shore and ruined the French fishery. This has largely helped to bring about the settlement."
"Forty years ago there were 1,500 Frenchmen on the coast; now there are less than 200 from France. While our antagonists have dwindled away, English settlers within the same period have increased from a few hundreds to a population of 16,000. The few firms that continued to do business on the treaty shore every year, and at a loss, have been driven out by the increasing money. A few years ago their lobster pack was 70,000 cases; it is now less than 4,000. Their whole catch of cod-fish has amounted in intrinsic value to \$50 a man."
"It is not only the failure of cod and lobster that has worked against the French. The activity of the present Newfoundland Government in putting down smuggling has helped to ruin the French cod fishery. At St. John's, Pierre had up to last season connived at and actually aided the smugglers; now they have changed their hand, and are most active in preventing contraband trading. All this helps to kill the poor French traders and to ruin the French cod fishery."
The judge concludes: "The principal obstacle to union with Canada will now be removed. If the Dominion will offer liberal terms, including a bounty to the fishermen and branch railways, the islanders may be induced to come into confederation."

WHAT TEA DOES TO RHEUMATICS.

When you next take tea, think of this. Tea contains 175 grains of Uric Acid in every pound.
Meat contains only five to seven grains. Rheumatism is Uric Acid in the blood. Uric Acid accumulates from food when the digestive apparatus cannot create enough uric acid elements (like soda) to neutralize it.
This Acid collects urea, or worn-out waste matter, from the system.
That Urea enters the blood when Alkaline action has not previously dissolved it.
By and by the waste matter reaches the joints and muscles, through circulation of the blood.
There it gradually deposits in solid particles, and causes inflammation. These solid particles grind between the joints and muscles at every movement, thus grinding cause irritation, and pain.
These in turn may develop inflammation and swelling. That inflammation bestirs Nature to help herself.
She proceeds to coat the hard Uric particles over with cushions of pus, pus, like the first healing strata of an outer sore.
This pus covering grows to the bones, as well as to the particles deposited. There it hardens like plaster or sealing wax. Next we have "bony joints," almost inflexible, and usually fixed in a bent position, from the pain and inflammation.
That is what Rheumatism is at its worst.
It is bad enough before it gets that far. But it is worse when it reaches the stage of Rheumatism. The first step is to neutralize the Uric Acid already in the system. Next to dissolve and carry away the hard deposits that grind between the joints. Then get the digestive apparatus into such healthy condition that it will unaided, produce less Uric Acid, and more Alkalines.

Anti-Chinese Legislation—Questions Answered—G. T. P. Debate.

Ottawa, April 18.—The question of the repeal of anti-Chinese legislation was brought up in the House today by Mr. Morrison, who drew attention to Premier McBride, of British Columbia's statement that the Empress of China had been corresponding with London in connection with the matter. Sir Wilfrid Laurier replied in the negative.
Mr. Borden asked if the Government would lay on the table of the House the commission and instructions issued to the joint high commission. Since it was pretty well understood that the commission would not convene he thought there could be no objection to the production of these papers.
Sir Wilfrid Laurier promised to produce the commission.
Mr. Borden wanted to know if all the papers relating to the Alaskan boundary dispute had been brought down.
Sir Wilfrid Laurier replied that before the end of the session all these papers would be laid on the table of the House.
The Opposition leader wanted to know if all the correspondence bearing on Mr. Blair's resignation had been produced. The Premier promised to make inquiries.
The Minister of Railways informed Mr. Lennox that the total cost of the railway cattle guard commission was \$6,829.
Mr. Clarke was informed that the Government had no record of any application for permission to obtain electric power generated in Canada to convey it to the United States.
The Grand Trunk Pacific debate was continued. Messrs. Frith, Henderson and Wilmet speaking against it and Messrs. Sinclair and Smith (Vancouver), favoring it.
Frank Schauke, of Vincennes, Ind., holds the United States record as an inventor and patentee. He has designed no less than 6,024 instruments of various kinds, obtaining patents upon all of them. None of his inventions, however, has brought him fortune.

city hospital, Hamilton, and the general hospital, London, were wholly under municipal management, because the citizens of these cities did not respond readily to the appeals for aid to these institutions. He claimed this statement was, in the case of Hamilton, at least, entirely erroneous, as there was nothing to cause the citizens to refuse to give the institution support. Their support had been generous.

Mr. Stratton thought it was, perhaps, indiscreet to have such a reference appear in the inspector's report. He promised the matter would be looked into.

The House adjourned at 11:10.

Secret Is to Do as You Are Told

Everyone Who Has Had Dyspepsia and Used Dodd's Dyspepsia Tablets tells You To Go and Do Likewise.

"I would have a Sour Stomach and Heartburn and could never touch any rich food. I was told Dodd's Dyspepsia Tablets would cure me. I concluded to try them and only had to use a half box when I was cured."

So says Isaac Jenkins, of 116 Dundas street, Toronto.

Isn't the lesson clear to you, you sufferers from the tortures of Indigestion? It is that you can be cured easily and quickly if you'll only do as you are told—use Dodd's Dyspepsia Tablets.

Who tells you to use them? Everyone who has ever used them, themselves. For everyone who has had Dyspepsia and who has used Dodd's Dyspepsia Tablets is today telling others to go and do likewise.

Mr. Hendrie drew attention to the printed report of the inspector of public institutions, which stated that the
