USE BAYONET TO Have Captured Bruges SLAUGHTER ENEMY

The French Marines Clear Trenches, Taking 400 Prisoners—Mines An-

nihilate Battalions. [Canadian Press.]

FROM THE BATTLE FRONT (via Paris), Oct. 20 .- The German invaders in their effort to shorten their lines and rest their right wing further southwestward on the English Channel, are meeting with a strenuous offensive by the Allies. A good part of the fighting is done in the obscurity of fogs. French marines yesterday put forth a fine effort against the Germans. The troops of Emperor William had tried a surprise attack on the marines Sunday, but they had held the field works against superior numbers. The fight lasted all day and then the Germans contented themselves with cannonading the position of the marines.

to such weather conditions, crept toward the German trenches. "No shooting," was the order, "use the bayonet!" Bayonetted Enemy In Trenches. The marines got within thirty feet of the trenches before they were seen. It was too late for the defenders, who were bayonetted in the trenches and beyond the trenches as they ran. Four hundred German prisoners were taken.

One of the places where the French had been most harassed is near the elbow of the western line. The important position there had been taken and re-taken frequently during the last three weeks. Every time the Germans had been obliged to abandaon the position, they returned in greater force and pushed back the French by weight of numbers.

Every Rod Mined By French.
The French took the position for the twelfth time and held it for ten hours. Then came a shock of the human bat tering ram and the French gradually gave way. The Germans began fortifying the place, but while they were engaging in this task the earth heaved and a deafening explosion occurred. The ten hours the French had held the point had been sufficient to mine every rod of the ground. It is estimated that three German

battalions were annihilated. The strength of the German positions north of Roye, which facilitated their movements toward Lille, is explained by the fact that they were occupying an unfinished canal as far as Roye. Germans found in the deep broad cutting magnificent entrenchments which they only had to establish their German Shells Fallures.

Officers of the Allies say that they have noted that only about forty per cent of the shells from these guns explode. They say also that the prodigality of the fire from them apparent-In has depleted the Germans' supplies of ammunition as the intensity of the fire lately has diminished. The French artillerists are so care-

ful in getting their ranges that they waste few shells. In an artillery duel near Armentieres the Germans fired for half a day into thickets that had been abandoned some time before. When the French three-inch guns finally got the range twelve shells from them silenced the German battery.

GERMANY DOES NOT KNOW THE RESULT.

BERLIN, via The Hague and Londo Oct. 21 .- Engagements near Nieuport Belgium, and Lille, where the allies' forces have been trying to beat back the German advance, continue. The French for several days have been attacking desperately in the vicinity of Lille, but, according to headquarter's bulletins, all the attacks have been repulsed.
