Colonel Mischick the Royal Assassin Made Ruler of Belgrade.

Servian Foreign Minister Repudiates Connection of Government With Crime.

France Ignores Recognition of King Peter For the Present.

Belgrade, June 20.—The Foreign Minister, M. Kalievic, in an interview this afternoon, expressed intense indignation at the announcement from London that the British minister had been instructed to withdraw from Belgrade for some time on the arrival here of King Peter. The minister said it was inexplicable why the British government intended to make the provisional Servian ministry responsible for the deplorable events of the night of June 11. The members of the present cabinet, he added, had really displayed great patriotism in coming to the aid of their country in the sad crisis.

Col. Mischick, who took a prominent part in the assassination at the palace, has been gazetted commandant of the military district of Belgrade.

Paris, June 20.—Foreign Minister Delcasse expressed the belief that he is likely to deprecate the Servian tragedy by an expression similar to those of Russia and Austria, but it is pointed out that King Peter took the initiative in the case of Russia and Austria, by telegraphing to the Czar and Emperor Francis Joseph, thus affording the opportunity for the Servian King to address the other powers and, consequently, to make rejoinders. The opportunity, however, will come when the question of the Servian recognition arises. In the meanwhile the French minister at Belgrade has been instructed to maintain a neutral attitude towards the new regime, until the question of power and his notice of that assumption to the foreign ministers.

Vienna, June 20.—King Peter will arrive here at 10 o'clock Tuesday evening. At the railway station he will receive the homage of the Servian Court and the central labor union, declared of Budapest, arriving at Belgrade Wednesday morning.

HIGH WATER AT NELSON

The Gardens And Houses Submerged Along the River Front.

Nelson, June 19.—The Kootenay river reached its highest point of the season this morning, and has subsided half an inch in the last eight hours. It is now 24 feet above low water mark. The tracks are under from six inches to two feet of water in many places on lines running out of Nelson. All along the water front gardens and houses are submerged, and if raise of water had not occurred, great damage would have ensued. A peculiar circumstance of the overflow is that it has solved a difficulty of the City Council. There were over 40 families of squatters living along the lake shore, whom the city authorities have wished to get out. Threats and proceedings proved of no avail until the water came, and they were all evacuated, and before the water subsided will be torn down.

Rumor That the Morgan Combine Will Dissolve or Be Readjusted.

Montreal, June 19.—The Star's London cable says: "The rumour in Atlantic shipping circles is that the sensational developments forthcoming concerning the unsatisfactory position of the Morgan combine, excited widespread interest here. Like the German elections, they are especially used as ammunition in the Imperialist campaign. The Liverpool Telegram declares that six Leyland vessels are laid up and three Atlantic Transport vessels in the Thames are about to be laid up, and the Southampton to New York intermediates are being discontinued immediately. It is stated that even American shippers are so dissatisfied with the service that they are starting to charter and other British lines. It is even said that a dissolution or a radical readjustment of the combine is not improbable."

SHORTAGE OF COKE STOPS ROASTERS

Accumulation Can not Now be Handled by the Trail Smelter.

Trail, B. C., June 19.—All of the hand roasters at the smelter are now closed down the last four that were running being closed this week. This was caused by the roaster ore accumulating to such an extent for the last month or so, that there is room for no more. This accumulation is due to the inability of the smelter to start the furnaces on account of a shortage of coke. The management has asked the mines to supply of fuel is secured, as the government is quite likely to start a bounty on lead ore mined in Canada. The chances are that all hand roasters and the lead furnaces will be started again by the course of the next month or six weeks, providing that the high water subsidies, and a new charge of coke supply is maintained. The completion of the Trail smelter refinery is being very much delayed by the lack of carpenters. There is plenty of work here for an additional dozen or more carpenters.

This proposition meets with a flat refusal from the manufacturers.

Britain's Deep Abhorrence

Lord Lansdowne Denounces Doings of "That Frightful Night" in Servia.

Outrage Unparalleled in Annals of Any Modern Civilized State.

London, June 19.—In the House of Lords, Foreign Minister Lansdowne announced that the British minister to Servia has been instructed to withdraw from Belgrade for some time on the arrival here of King Peter, and in the meantime to do nothing which could be construed as a recognition of the new government. Lord Lansdowne expressed indignation at the crimes at Belgrade, and thought it was not desirable that Sir George Benham, the British minister, should be inaugurated. The Foreign Minister added that no proposal had been received from the new government to have any of its powers concerned in the massacres. The government yielded to none in its abhorrence of the crime which had lately disgraced the capital of Servia, and that abhorrence had not been diminished without consolation by Germany reaching the Foreign Office. It would be no exaggeration to say that it would be hard to find a more heinous outrage even in the annals of the states which made no pretence to be included among the civilized nations of the world.

JUDGE ARMOUR'S CASE IS SERIOUS

Jurist Given Up by Eminent Physicians in Attendance in London.

Toronto, June 19.—The News' London cable says: "Canadian generally will regret to hear that the condition of Judge Armour is considered hopeless. The sick jurist is being carefully nursed at the residence of his son, Dr. Donald Morgan, Wimpole street, Professor Sir Horsley, and other eminent doctors in London, are in attendance, but they do not hold out hope of the jurist's recovery. The family is exercising what is considered unnecessary reticence regarding the judge's illness, which is well known to the inside circle of Canadians in London. The judge himself never expects to sit on the bench again, and is considered that Canadians are entitled to know the truth regarding the condition of one of the Dominion's greatest jurists, especially when his health is of international importance, by reason of his membership of the Alaskan Boundary Commission."

The diplomatists did not reply, pending the receipt of instructions from their respective governments. The government has practically empty, and has no means of raising money. The banks have refused to refound even a small loan. An instalment of the recent French loan was due on June 15, but with the cash refused to hand it over until the status of the government is properly defined. The expenses for the deputation which has gone to Geneva were met with difficulty, and the army and navy officers of the staff to take actions between the government and private individuals, the ministry has been promoted to the legislature. Those subjects are involved, that the ministers will be personally responsible for the repayment of the following notification, presented today, says: "The Russian minister here informed the Minister of Foreign Affairs, that he will enter into relations with the Servian government today as the Czar had been pleased to recognize Peter Karageorgewitch as King of Servia."

Fails to Secure Specimens of Rare Fish at Nanaimo Harbor.

Nanaimo, June 20.—One day, about six years ago, as Herbert Stanton, local registrar of the Supreme Court, was passing the fish market here, he saw a fish on the slab which struck him as a curiosity. Mr. Stanton forwarded the specimen to the provincial museum at Victoria, where it was preserved. This, however, was not the fish which struck him as a curiosity.
