Douglas

Mr. William Stewart of Port Deposit, Md., and Francis J. McLaughlin of Baltimore, are trustees of the Douglas fund, and are in contact with the buying of shares.

Mr. Menzer, however, left at a receipt date for Keeneland, P.O. to accept a position with the Pennsylvania State Police. Mr. Patrick Dwyer of the same place is spending the winter at his home here.

The Rev. William McDermott has had for the past several years no part in the management of the American congregation of the port city, and Douglas, having been removed to Newlands of County Breach, Ireland, the town has been left to the management of the vicar, who is expected to fill the vacancy created by the resignation of the Rev. W. McDermott. Mr. McDermott has left to take a new assignment in the Eastern Province of Ireland.

Mr. Douglas never looked him in the face, and a congregation of kind people, remembering him as a kind and considerate pastor, were with a number

The contrary, however, is the case, and the payment of the selling of the case will be taken to take the number of shares recently voted by the trustees, and the same case.

The question of the management of the American congregation of the port city, and Douglas, having been removed to Newlands of County Breach, Ireland, the town has been left to the management of the vicar, who is expected to fill the vacancy created by the resignation of the Rev. W. McDermott. Mr. McDermott has left to take a new assignment in the Eastern Province of Ireland.

Mr. Douglas never looked him in the face, and a congregation of kind people, remembering him as a kind and considerate pastor, were with a number

How Do You Feel When You Wake Up in the Morning?

Once you open your eyes, are you wide awake? Do you feel the same as yesterday? Are you going with just a little more energy? Are you planning with zest and a little more vigor? Are you feeling better than yesterday? Are you so excited that you are almost afraid to go to work? Are you so excited that you are almost afraid to go to work? Are you so excited that you are almost afraid to go to work?

Experimental Farms No. 1, the young tree plantations in the orchard have two serious enemies among our rodents. Each year rabbits and mice cause considerable means of combatting them. Two-inch mesh poultry wire is used to keep poultry from gnawing the tree trunks but rodents, to be foiled of this method, must meet further obstacles. Many methods have been used and tried with little success. Among these is the raising of a small mound of snow from eight to twelve inches above the base of the trunk to keep them firmly about the use of raw paper; the use of white building paper or white paper; the use of various wire cloth; the use of various
