Gossip From Chicago.

Kennett, Hopkins & Co. to R. Cochran: Cables continue indifferent, but engagements for export are large, as well as the clearances. It seems reasonably certain that stocks will diminish quite rapidly in the near future. The decrease in Bradstreet's visible, which has been going on for some weeks, amounting to nearly 5,000,000 bushels last week, indicates that country stocks are being absorbed even faster than the official visible. The situation is improving for holders. The weather is unfavorable for spring wheat seeding, and the impression is gaining ground that the next Government report will show little if any improvement in winter wheat. The liquidation in May option has tended to weaken prices to-day. The uncertainty with regard to May deal in corn grows denser if possible, and traders are inclined to bet it alone and go into July. The latter option has strengthened rapidity, as it is being bought on its merits. Oats are dull and featureless. Provisions have done somewhat better to-day, but the trade is still light and there is a lack of confidence. Gossip From Chicago,

The clearances fair. Cables were firm, and bad weather reported in spring wheat sections made the local shorts run and market was strong and le higher first part of the session. At the advance the buils tried to realize, but outside buying orders were soarce and market sagged off under their sales and closed at lowest point of the day. To-day's advance and decline shows that this market needs outside help to keep up prices. Corn closed easy, receipts were moderate. The receipts of hogs were about as estimated and prices at the yards were unchanged. Provisions opened strong with packers and outsiders buying. shown some wonderful bargains. longer we will allow 20 per cent. discount.
