

The KEYSTONE

**Percussion Core Drill Attachment
is an economical appliance for
TESTING COAL LANDS.**

It can be used in connection with any good "churn" drill, but operates best on the long stroke KEYSTONE, thus making the cheapest and quickest method of coring to be found.

In operation a hole is sunk to the coal with the ordinary Rock Bit. The Bit and Stem are then removed and the Coring Attachment put on in their place. It takes a 4 ft. core out of the Softest as well as the Hardest part of the vein. Avoids all delay and expense of "rolls" water wash, diamonds, shot, and heavy operating mechanism.

**Price of Complete Attachment
\$200.00**

Catalog No. 2 B. is a book on the subject.
We make Water, Oil & Test Well Drillers
for all depths and purposes.
