We were very fortunate in having all orders in every department placed before the surtax was put on German goods, meaning a saving of 10 to 15 per cent., and our customers certainly will get the benefit. Our complete stock is now in and ready for sale; it is very complete and some good judges of fancy goods say our assortment cannot be beaten by any house in Canada. The prices will be as good as last year, and in some cases better. It will pay to buy early. A personal call respectfully solicited.
