

YUL LOVE TO DO BUSINESS IN MONTREAL

YUL is the airport code unique to Montreal. There are many other factors that make Montreal a unique place for international investors to do business: easy access to over 100 million consumers in the Boston, New York and Washington D.C. areas and other North American markets (including Mexico); four universities and over 250 research centres; state-of-the-art telecommunications infrastructures and a highly efficient intermodal transportation network. Montreal is one of the world's safest, most highly rated cities with a remarkably low

cost of living and one of the least expensive places to do business in North America. Montreal International is the result of a unique partnership between the private and public sectors. It offers foreign investors one-stop shopping for all their business needs: joint ventures, direct investment, support for investments and information on the financial and business environments.
