## Railway Accom- modations

The town is connected with Winnipeg by a branch of the Canadian Pacific Railway, and East Selkirk Station on the main line is only two miles distant, so that railway accommodation is ample.

The Selkirk branch has been extended north from Selkirk to Winnipeg Beach, the new and already popular summer resort, and that such extension is going to be of extraordinary benefit to Selkirk can readily be seen by the large tract of land for farming tributary to Selkirk that is being opened by such railway connections.

As an illustration of the business done in Selkirk it is interesting to note that the railway receipts rank third in the Province.
