Etickson Perkins & Co. had the following:

Etickson Perkins & Co. had the following:

Wheat—The market opened quiet, but later in the day advanced sharply on covering by shorts, as well as buying for long account, on the strength in corn. There was some precipitation in southwest, where needed, and prospects are for more. Trade was not large, and mostly all of a local professional character. Cash demand here was rather quiet. While the world's situation from a statistical standpoint is bearish, still future prices will be largely governed by crop conditions. Large holdings by bull leaders keep the market tight, and they show no disposition to let go.

Corn—Our market opened firm on the light country offerings and Argentine news, and later became strong on free covering by shorts, and a sharp advance took place. There seems to be a general sentiment that corn is worth around present prices, but the future will depend a good deal upon the attitude of the farmers and the cash demand.

Oats—There was no special feature to oats. The market ruled firm in sympathy with the advarce in corn. Country offerings are fair and cash demand quiet.
