set-back.

Wasapika held its position yester-day as leader among the gold stocks in the local mining market, and this, too, in the face of the fact that trad-ing broadened out considerably, with brisk buying in a number of issues. In the silver group Adanac had pretty largely a monopoly of in-terest, this issue scoring a smart rally on heavy transactions. The north was reported to be a persistent buyer of Adanac all day. The general en-largement of buying power came as an encouragement to brokers, and hope that the market will before long take on genuine breadth was revived. From the north come reports of deals completed, and others in process of completed, and others in process of being carried thru, and it seems probable that the stocks of the properties affected will begin to reflect these activities in the near future. Wasapika had a big trading day, the total of 17,400 shares being the argest in the gold list. After a strong opening at 60, there was an advance

to 62, the net gain of three points be-ing retained at the close. There is still, however, quite a wide spread between the market price of the shares and the prices at which the shares are convertible if turned in to the interests that have contracted for

a control of the stock. West Dome awoke from its torpor and moved up awoke from its torpor and moved up half a point to 14 1-2 on a turnover of nearly 17,000 shares. Little has been said for some weeks about the possibility of West Dome's entering into a consolidation scheme with ad-jacent properties, but apparently something is in the wind again. Lake Shore was strong at 99 1-2, the highest point in some time, and McIntyre at 1.64 and Schumacher at 35 each prices had risen to the topmost point yet this season. The close was heavy, 7-8c to 23-4c net lower with May 1.561-2 to \$1.563-4. and July \$1.561-2 to \$1.567-8. Oats finished 1-2c to 11-4c down, and provisions varying from 7c decline to 50c gain. vere a to the opinion later that, at least for the time being, the advance had gone far enough, and that a re-action was due. The initial display of corn strength resulted chiefly from action of the Chicago Board of Trade directors in ordering withdrawal of the maximum limit on changes in the value in provisions. On the bulge, however, commission houses turned a square about-face and it quickly became apparent that support for corn was wholly insufficient to ab-sorb the sudden surplus of offerings. Evidence of hedging pressure intensi-fied the late weakness, and left, the market in the end near the lowest level of the day. Oats were swayed principally by corn. Hughes, Harcourt & Company, 307 Royal Bank building, received the fol-lowing wire at the close of the Chicago market yesterday: The buying strength of yesterday was continued into the early part of today's session, corn prices advancing to new high levels. From 153½ to 154% there was continued sell-ing that took the edge off the market, and when local bulls started to sell, the price gave way rapidy—there being a price gave way rapidly—there being four-cent decline from the high point On this decline large buying took all of ferings, and again tightened up the mar sterings, and again tightened up the mar-ket, engineering a quick 2½ point rally. There has been steady selling of the fu-tures against country purchases for de-ferred shipment, and this has changed the appearance of the market consider-ably. While the amount of this selling was not large at any one time, the total amount so sold since the market ad-vanced to over 150 for July has been considerable. lity of prolonged prosperity. The unprecedented export demand for silver continues in the United States. Metal experts declare that it will take more than ten years to re-place the store of bullion which has been exported during the 12 months ending June 1. It took over 25 years to accumulate these millions of ounces of silver That is the reason that the mining

man looks for silver to be on a parity with gold in the next quarter century. That's another reason mines producing silver in appreciable quantities will be able to show satisfactory earnings in
