MARCONI SUCCEEDS

The whole civilized world will be electrified by the announcement, printed in another column, that Marconi has succeeded in transmitting a message across the Atlantic Ocean, and that the message has been brought into actual communication with each other by means of wireless telegraphy.

That new the crucial test has been made, and it has proven successful. From his Glace Bay station, in Cape Breton Nova Scotia, Marconi has communicated with Poldhu, Cornwall, England. The first transatlantic wireless telegraph message was signed by Lord Minto, Governor-General of Canada, and addressed to His Majesty King Edward VII., and the British monarch is now in receipt of the marconigram.

TRADE OPENINGS IN ASIA

That erstwhile Canadian, J. J. Hill, president of the Great Northern Railway, has been reading his adopted country a plain lesson. He has been seeking to impress upon the "American" people the important future that lies ahead for the export trade to China, and he has been taking them to task for not striving to secure and hold such a trade.

THE BIBLE AND MUSIC

Vancouver World: Athelstan has no music of its own and the cheerful halls of fidelity never echo the sound of song. Perhaps it is because of this that we instinctively shrink from the man who despises music. In any age the dictum of our greatest poet appeals to most of us when he says: The man that hath not music in his soul is fit for treason, stratagems and snail.

THE BIBLE AND MUSIC

The story of "Searchlights of a Great City" is taken from the legends and traditions of the most ancient and noblest of nations. It is a story of the life of a man who was born in a poor and obscure village, but who by his own efforts and the aid of his friends, became one of the greatest of his age.

DAMAGING A CANADIAN INDUSTRY

Canada stands to lose much through certain despatches that have recently appeared in the public prints. Reports lately published have tended to create an impression abroad that the foot and mouth disease exists in this country. Because of the presence of the source in the New England States, Britain has placed a prohibitive embargo on cattle from certain "American" ports, and there may be those who would gladly see the Canadian ports shut up in the same way.
