### SAY NEW CLASSIFICATION WOULD INCREASE RATES

Shippers Object Before Railway Board to Application of Railways.

Members of the Toronto Board of Trade and Canadian Manufacturers Association were present in force Saturday morning, at the resumed sitting of the Board of Railway Commissioners in the city hall. For several hours shippers argued against the application of the Canadian Freight Association, in behalf of the railway companies, for the approval of the proposed freight classification No. 17.

The shippers pointed out that the new classification meant a substantial increase in rates, and that under present conditions it would be detrimental to the interests of all concerned to change the classification. The board reserved decision, as many more protests are to be heard. Hearings will be held on Tuesday in Ottawa, and on Wednesday in Montreal, to enable shippers in those cities to place their objections before the board.

The master of the complaint of the Toronto Board of Trade, that railways are required to justify tariffs of increased charges and exceptions thereto, that were published and filed effective March 1, of this year, was also reserved.

Col. V. Eaton, South African Veteran, is Dead of Wounds

Lieut. Col. Vernon Eaton of the Royal Canadian Horse Artillery died of wounds on April 11. He served in the South African war and was for some time on the staff of the Imperial War Museum. He was specially recommended to the staff college by Lord Roberts, and was the first Canadian to be promoted to the rank of lieutenant colonel.

From 1906 to 1911 he was director of military training in Canada, and in 1916, after serving at the front with the Canadian Horse Artillery, he was relieved and went to England where he trained the Canadian division artillery. He later returned to Canada as a brigade commander and was killed in the performance of his duty. He was the eldest son of the late J. K. Eaton of Truro, N.S.

## CANADIAN WOMEN ARE STRANDED IN ENGLAND

Col. W. T. Stewart, Home on Leave, Says Thousands to Be Sent Back

That there are three thousand Canadian women stranded in England was the opinion of Col. W. T. Stewart, O.C. of the 4th Canadian Infantry, who has just returned to Toronto for a few days, having been chosen to take command of the 39 officers and several hundred men who returned to Canada this week.

This is the first occasion on which a colonel has been asked to undertake this duty, he being appointed on account of the number of officers on the ship. Col. Stewart bore despatches to Ottawa and returns to the front shortly.

Col. Stewart thought that arrangements would soon be made for the return to Canada of the stranded women. England is on ration and there is apparently an entire absence of sugar. He greatly praised the manner in which the authorities were getting after those who sought to hoard food and thought that it was next to impossible for anyone to evade the vigilance of the authorities.

The colonel was immensely proud of the work of the Canadians and stated that they were regarded as the top-notch men in England. The outstanding feature about them was their absolute conviction of their ability to beat Fritz. Col. Stewart recalled that Vimy ridge was lost by the British almost a year ago and that General Byng asked that the Canadians be given the task of recapturing the lost position, which is not only an important strategic point, but one that gives the British control of about twenty miles of level country.

## "We use Extra Power on every drive, now"

It is not long since the men who buy belts in mines, mills, factories, machine shops and foundries were skeptical of a new basis rubber belt.

But the qualities of Extra Power were convincing. They began to buy this belt for big drives—main drives, rolling mills, ore crushers, mule drives and bucket elevators.

Then, here and there, piece-workers began to prefer their machines belted with Extra Power. In munition work, where speedy, continuous production day and night is demanded, men who knew put Extra Power on lathes, grinders—on motor drives and countershaft drives.

More and more, now, industrials are using extra power on all drives. On big drives and small—big belts and little—fast drives and slow—steady loads and intermittent—in heat, steam, acid fumes.

This would not be so if Extra Power were not standing up and delivering the goods. Ask factory superintendents why they use Extra Power. They will tell you, as they have told us, that it transmits more power and gives lower cost by lasting longer.

The moving picture license of the International Bible Students' Association has been suspended by Hon. T. W. McGarry, and will remain suspended unless the association can show cause why they should have the license.

Mr. McGarry said on Saturday that the license had been granted to the society without the usual charge because of the religious nature of the association. It had been represented to him that the association's meetings were anti-military and injurious to recruiting. Mr. Otto Elliott had so reported to him. The minister said he had no intention of continuing a free license to such an association.

The minister said he had received a letter to the effect that a consistent attendant at the association's meetings was a strong pro-German.
