## QUEBEC TORY METHODS

"I pledge my word of honor that if you elect Mr. Morgan on Thursday, the marine railway will be voted during the parliamentary session which will open next month. And if the government does not keep the promise which was made to me in writing, I will ask Mr. Morgan to resign his seat, and I know he will do it."

The above sentences express the views of Sir Rodolphe Forget concerning the marine railway. In his view there seems only one issue in Canada broad enough to attract the attention of the intelligent electors of that constituency, and it is a marine railway. Sir Rodolphe made another promise. It was that eleven tory members of parliament would arrive at Sorel the next day, no doubt to help the people make up their minds that a marine railway was really the only thing worth talking about in this campaign. If the people of Richelieu are open to a bribe, perhaps they will elect the tory candidate today.

## GOOD IN THESE BOYS

The Montreal Star prints a story which makes us think more kindly of the boys who are classed as delinquents. There is a boys' farm at Shawville to which delinquent boys are sent. The mother of one of these boys is friendly and suffering from tuberculosis. The knowledge of her condition came to the boys in the institution, and they decided to take some action for her relief. A deputation waited on the superintendent and asked him if they might take from the small amount which is placed to the credit each month a portion to be given to the suffering woman. None of them had more than \$2 in the fund, but altogether they subscribed the sum of \$30.15, and asked the superintendent to send a check for that amount. It is said of one of the boys that when his name was called he asked how much he "said to his credit." "A dollar and a half," said the superintendent. "Then I'll give a dollar and a half," said the boy, and set down. These boys had gone wrong early in life, and it had been necessary to take them away from the influence of the city streets and give them an opportunity under more healthful conditions to make a fresh start. The story told by the Star leads one to believe that very few of them will go back to their old habits, if on their release they can be placed amid surroundings calculated to bring out what is best in their nature.

## MANITOBA'S SHAME

Referring to the Macdonald election the Winnipeg Tribune says:—"If the public indifferently allows the seeming prostitution of justice that has been resorted to in connection with the Macdonald election and particularly in connection with the attempted peroration of voters in St. James to pass without vigorous and effective protest, and without applying the probe to the last point, they will have themselves to blame if British freedom and British liberty degenerate into a farce, and anarchy succeeds law and order in our province. This is strong language, but in view of what has happened during the past ten days, would decent citizens be blamed very much if they refused to submit to the brand of 'justice' that has been masquerading in our midst lately?"

On the same subject the Montreal Witness says:—"If as is charged the provincial magistrate for the city of Winnipeg can, with impunity, for himself and the government that appointed him, let off political corruptionists without regular trial and with illegal sentence, and afterwards use profane language in his own court to the lawyer who objects to his proceedings, then, indeed, is justice all in Canada and must be turned back to robust health."

The Ottawa Free Press says:—"The Citizen (Conservative) accepts the correction of a non-partisan Winnipeg freedom of clear judgment that the Macdonald election has not minimized the cry of the west for reciprocity. He declares that in all his experience he has never met before 'with such a degenerate light, with the senses so obscured with vile tactics.' Even the Citizen has come to the conclusion, with which everybody will agree after reading of the tactics of the henchmen of that precious pair Rogers and Roblin, that in Macdonald the will of the people was not in evidence 'and money has been talking more loudly than common sense.' But what appears more serious than the distribution of money in Macdonald is the prostitution of justice to political ends as evidenced by the trumped up cases against Mr. Sifton and other Liberals in order to get them out of the way on election day, and the extraordinary methods that were adopted to release two self-confessed persons who, according to law, should have been sent to jail for three months without option."

American bankers realize the importance of agriculture to the general financial welfare of the country. An exchange says:—"Realizing the close relationship between the success of the farmer and their own prosperity the Nebraska State Bankers' Association have determined to create a fund to be devoted to furthering the interests of agriculture. The first concrete result of the bankers' interest in Nebraska is to be the establishment of a series of demonstration farms throughout the state. The bankers will see to it that money is raised for paying the salaries of scientific

agriculturists supplied by the agricultural school. These men will work under the direction of the school."

Those who hoped the city council could get cheaper coal for them must abandon that hope. Glasgow has no coal to offer, nor has Pennsylvania, except through the regular channels.

The allied armies are reported to have achieved some successes over the Turks, but at a heavy sacrifice. They can ill afford heavy sacrifices so early in the struggle, for the Turk has remarkable staying qualities.

Conservative Clubs here and there continue to assert their loyalty. Do they think the public have reason to doubt it? Most people are willing to have their loyalty taken for granted, as an essential element of their citizenship.

Mr. George McDade's paper on publicity, read before the Union of New Brunswick Municipalities, was a valuable contribution, and is worthy of the attention of the citizens of St. John, which at the present time should have more to gain from a vigorous and well-directed campaign of publicity than any other city in Canada.

St. John readers of newspapers published in other cities are frequently reminded that this city has still taken no adequate steps to deal with tuberculosis. In his annual report to the Royal Edward Institute of Montreal this week Lieut. Col. Burland told of the increased number of patients in the early stages of the disease treated at the institute during the year, but pointed out that the city needed a hospital for the treatment of advanced cases. Charitable citizens had bought a site and were willing to erect a hospital at a cost of \$100,000, if the city and province would agree to maintain it at an annual cost of \$20,000. It is also proposed to establish an open air school on the roof and veranda of the institute, for children affected with tuberculosis. To impress more strongly the need of vigorous action Col. Burland noted the fact that Germany had reduced mortality from tuberculosis from 30.5 per 10,000 in 1880 to 15.25 in 1910, with the outlook that within thirty years the disease would become extinct.

The Victoria Colonist observes that no one has very much to say in favor of the Turk, and that "the fact that they are not Christians makes them abominable in the sight of many people, whose antipathy is not particularly burdensome to them." As a reason for the general prejudice the Colonist suggests that it is due to the failure of the Turk to acquire our voice with facility. Thus:—"He is barbarian enough to prefer his own. And this is something we can never forgive in a race. It is even worse than to be of a different color. A race may equal us in virtue, but that counts for little. A Turk may be brave, sober and industrious, as the Turks as a people are, but that does not count; he may worship God in his own way a great deal more sincerely than we do in our way, but this does not help him any, if it so happens that his voice differs from ours. The negro comes among us, says things the way we say them, and imitates our bad examples, as if he were born to them, and we call him 'a man and a brother.' How would it do for us to give the Turk a little fair play in our minds? He gets mighty little of it at the hands of the nations."

## MORNING LOCALS

A small boy from Victoria school was before Police Magistrate Ritchie yesterday for stealing a gold watch from J. H. Scott in the public hospital. He was given a warning to be good in future, and after promising to be good in future, was allowed to go home with his mother.

The Thorne Lodge fair closed last night with a very good attendance. The prizes which were donated by friends of the lodge were won by the following parties: Door prize, No. 292, cushion, won by B. Chamberlain; painting, No. 1194, won by T. N. Stockford. A doll was won by G. P. McTavish and a clock by W. Chamberlain.

The Royal Bank of Canada will open a branch in Sussex. It is not known here yet who will be in charge, but the branch will be started immediately.

## A STEP AT A TIME

Have you ever noticed how unreasonably the man at the bottom of the ladder envies the man at the top? Not until success has been actually attained does the man appear at the top, and the consequence is that he gets scant credit for the step at a time climbing which has brought him there.

Thus, at any rate, is the experience of the Midland Vinegar Company, of England, the manufacturers of H. P. Sauce, who are now at the top of the ladder—H. P. is an assured success—everybody who tastes it likes it, and recommends his friends to make a trial of it.

Amid the general buzz of success no one has leisure to imagine what a long time was given over by the Midland Vinegar Company to careful experimenting with different combinations of rich Oriental fruits and spices, before a perfectly delicious, rich, thick, fruity sauce like H. P. was arrived at and christened, and sent forth to win its way with the people. H. P. has been a success from the very first but that is because its manufacturers climbed up to it a step at a time, and did not vaunt themselves as sauce manufacturers until they had a perfect sauce to talk about. You try H. P. You will like it—everybody does.

## WHAT CANADA NEEDS

Vancouver Sun:—Canada at the present time cannot afford to fill up her cities with laborers and artisans who will congest the labor market and either add to the army of unemployed, or greatly depress the wage rates. What Canada needs above all else is farmers and farm laborers who will become homesteaders. She wants a good, healthy, responsible citizenship, not crowds of unemployed who will add to the labor problems of our cities.

## \$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreadful disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars reward for any case that it fails to cure. Send for list of testimonials.

## THE "ACME" STEEL LADDER

This Ladder is made entirely of steel in one foot links. You can add or take away from its length at any time.

Here are a few reasons why you should have one of these ladders on your house:—

It is a ladder that will be left on the building at all times, and when fire is discovered it is in the right place.

It is indestructible by fire. It is cheap.

It is rigid. It is safe. It saves you money.

It will last as long as the building itself.
