## POOR DOCUMENT

And now after all our trouble to do the hing up properly, Fredericton is laughing or fouretting the ices at the even-ing reception to the vice regal party. We were mad enough at being broiled like live is a structure of the structure of the even-holation of treating our best girl at the obsters that night without even the con-solution of treating our best girl at the introducture of the structure of the structure introducture of the structure of the struc-night at by a provincial town like Fred-with a structure of the structure of the introducture of the structure of the structure into pride left (and that's badly shattered at the celestial city when it pittes us.

AROUND THE TOWN.

That was a pretty good joke that Lord Minto unwittingly gave vent to when he complemented Ohief Clark on the hand-some appearance of St. John's "finest" at the fire brigget time out. There were only two policemen in sight, and the salvage sorps boys with their white helmets were loing police duty on the fire line. They got the gredit of being cops.

1.1

A good many suggestions are being made by the man on the street of methods to be employed in entertaining the Duke of John. Chatterer has one that will com-mend itself to the wisdom of all the sen-able people. It is to make the duke an homorary member of the fourth estate He will get a humorous risterad of a bore on him. It will also enable the duke to learn a lot of useful things. For instance, he will learn how to buy a Sunday sold in abits of the Lond's Day Allianice, how o dodge a give address, how to have a sold time without money, how to tell a mank when he is too far off to bore him, hid here the great unwached of st boah are in spite of the foibles of the load upper tendom. But it's no use, hi he duke learned all these things he would never soment to be a duke any longer, he will learne to be in a to buy a sunday sold in duke learned all these things he would here to be and the st things he would never soment to be a duke any longer, he wild insist on being a newspoper man. a se la 🔹 p / anna anna 1. 2 . . . . . . E

A fortion individual wandered into the office the other night and handed in the following production:

"PITY POOR MINTO."

Have you seen Minto? He was dragged into Receiving an address, perhaps you know the rest;

St. John is just large enough and suf-ficiently cosmopolitan to hold nearly every well-known type of the genus homo. Some of these types are met with in almost every corner and others only develop at uncertain intervals. There is a man who always button-holes you when you have an engagement to keep and you are hur-rying to keep it. He is a particularly friendly man-for a person who lacks tact is always of this persuasion-and he usu-ally has a long story. He has a special dispensation to test the long suffering patience of his fellows. Rightly under-stood he is a chastening spirit whose ministrations make for the lasting ben-efit of others. But he is seldom rightly understood. understood.

PEOPLE WE KNOW.

Then there is the inquisitive citizen, of male and female persuasion, who always probes the sore spot in a desire to know how at all happened. The home of mourn-ing is his or her favorite haunt and a ministering angel proves by driving away the anguish of grief from the mourner and replacing it with a deep seated de-sire to commit murcler in the first de-gree. The malice aforethought is present in the mourner's heart and his hand is stayed only by the terror of the thought that the inquisitive citizen's name is legion and to remove him must entail a holocaust. It is the inquisitive citizen who regards

Winnipeg summer It is the inquisitive citizen who regards the ambulance—and its suffering occupant —as public property to be gazed at to the heart's content. He gathers in swarms when that useful conveyance is required and lifts the handkerchief from the sufferer's face so that he may be able to retail all the facts with proper gusto to his less fortunate neighbors.

. .... Then there is the patriotic citizen who is yearning to do and die for his country, while the other members of the family provide the funds for "the butcher, the baker and the candlestick maker." He is too busily engrossed with the mation's affairs to attend to his own. When a war is in progress, he becomes the self-appointed barbershop war critic and strategician and fights the battles out in the only manner approved by such war authorities. You met him last year. He led the British relief forces into Lady-smith while Buller was wasting time on the Tugela. Sometimes he is a militia man, and from the lofty eminence of his superior military training blasts his op-ponents with a withering score which is fine to see. Sometimes he is a philoso-pher and is ready to argue any abstrase question and give you the choice of sides. hat is that

China of late, or else consent to an immi-gration pohey less drastic than that repre-sented by the Geary law. That, in a nut-shell, is the dilemma widh which our gov-ernment wil be confronted next year. That a satisfactory way out of the diffi-culty will be found there need be no doubt, if only demagogy and partisanship will keep their hands off, and leave the matter to be settled diplomatically by the representatives of the two governments.-Milwankee Sentinel. What the Swiss Have Done. In nearly all the large nations of the continent, where municipal ownership of China of late, or else consent to an immi-gration policy less drastic than that repre-sented by the Geary law.  Professor Robertson Home--Tells of What the Steamers will Do--Growing Business Ottawa, Aug. 4-(Special)-Professor Robertson returned here today after spending two months with Hon. Sydney Fisher in Great Britain promoting trade in Canadian fruit products. They had in-terviews and conferences with merchants and addressed meetings of those interest-ed in Canadian frade or its extension. One of the main objects of their visit to Bri-tain was to arrange with owners of steam. and addressed intende or its extension. One of the main objects of their visit to Brittain was to arrange with owners of steam ship lines for improved accommodation for the carriage of cheese and apples, that is to have a system of mechanical refrigerators and circulation of cooled air. The Allan line undertake to have four. Steamships equipped with this. They will sail to London, Liverpool and Glasgow. The Thompson line are to put this improved refrigerator and circulation system on three of their steamships from London and improving the system used on the others. The Donaldson line has already mechanical circulation of air in part of their ships and they are now putting in cold air plant on one ship. Two steamships of the Manchester line were fitted up in this way.
The found all the steamship owners, with the exception of one, most favorably disposed to meet the views of the department in this matter. Mr. Robertson also arranged for getting valuable information from those engaged in Canadian trade which will, it course of time, be distributed to Canadian exporters.
Referring to the immense development of trade with Britain, Prof. Robertson said that in 1900 Canada exported 10 times more Canadian products than 10 years ago. She exported 60 times as much butter, 20 times as much bacon and twice as much cheese. Instead of sending seven per cent of Efficient's food picofacts we now send 16 per cent and, said Mr. Robertson, "there is no reason why we should not keep up that rate of increase and make it 30 per cent in the next 10 years, which would mean an export of \$200,000. teep up that rate of increase and make it 30 per cent in the next 10 years, which would mean an export of \$200,000,000 worth a year." The American cheese has almost disap-peared in Britain, being now down to 12 per cent as against Canada's 60 per cent. COAL TRUST SENDS

Dunn & Co.'s weekly review of trade tomorrow will say of Canadian trade: Over production has lowered prices in some lines at Halifax, while rains have im- proved crop prospects. Building operations are active at Hamilton and harvest generally good, hay and root crops compensating for some loss in wheat. Toronto peopts traffe fair, for the season, with hardware, metals and leather In good demand. Winclesale trade is quiet at Quebec, but a disay fourist travel	Slightly Cynical. Sillicus—It is a beautiful thing to see a young girl growing into womanhood. Typicus—That's right. So many of them seem to want to grow into manhood.—Tit. Bits. Of Much More Practical Use. Goodly—What is grander than a man you can trust? Cynicus—One who will trust you.—Stray stories. But Not Her Face.—Gussie Gush—Do you know I paint? Willie Softleigh—Aw— weally, Miss Gush, I nevah noticed it.— Ohio State Journal. Ten blind physicians are practicing medi- cine in the United States. (Chicago expended more money for parks last year than either London or Paris. 1 Johnny.—Pa, what is a grass widow? Pa—It is a woman whose husband is a roving blade. Herbert Crombie Howe, for a number of years secretary to President Schurman, of Commell University. Mas been annoticed	of representation in the next parliament will be about 25,000. In regard to the number of members there will not be very much difference. There will be a reduction in the representation from the maritime provinces and also from Ontario, but this will be made up for by the increase from the region west of Lake Superior. Prince Edward Island will no doubt lose one member; Nova Scotia one, if not two; New Brunswick one; and Ontario one or probably two. The representation of Mani- toba and the Northwest will be consider- ably increased, and the Yukon district will be represented in the next parliament. One of the principal subjects which will be discussed in the house of commons next session will be the census. It is use less to deny that there is a great deal of distristaction, especially among the enu- merators, in ne-poot to the way the work was done. The opposition will also en- deavor to show that an effort was made to increase the population as far as pos- sible in the province of Outario, where the government gets its large following, and to make the population as small as possible in the province of Ontario, where the Conservatives are strong. Just how far they will succeed in this is difficult <sup>10</sup> say, but certainly an attempt will be made to do it.
opalar affection by the harpists or the erman band. One son of sunny Italy, the struck town last week with the nevitable street piano, has probably hit pon the best method yet of bringing spare bins his way. He is accompanied by a lack browed, olive skinned senorita with pair of eyes whose liquid depths con- rre up visions of sunny Southern seas, rape vines, macaroni and the rest of it- his maid is not only possessed of such itching opties but she knows how to use nem in the best possible manner. Chat- rer saw the pair on Charlotte street the ther evening surrounded by a crowd- ne man monotonously grinding out mel- dy from the street piano and the maid eating a soft accompaniment on a dainty umbouring. At the end of each selection he passed among the crowd and as she thended the tambourine with a mute opeal treated each man to one quick, eep glance from those marvellous eyes. here was no getting away from her. me look was generally enough to bring ut a nickel or a dime and with a ravish- g smile she passed on to the next vic- im. That girl is a wonder. If Chatterer ad her ability in the line of making eyes e'd be inclined to buy a banjo or a flute and start in business. Meanwhile, her vic- ims are sadly whistling, Just because she made those goo goo eyes.	The ground then mearest to her son Was twenty feet below. The farmer sauntered down the lane, A sturdy man was he: He saw the child and stopped a-while Beneath the cherry tree. These night a boy went limping home, Depressed and bruised and sore, And vowing he would "never climb A cherry tree no more." He work those little trousers out: The years went gliding past, And, as a man he stood beside His mother's grave at last. They cut the cherry tree away, Because the tree had spread: And someone wished to clear a site On which to build a shed. One day a man who, as a boy, Had made a vow that he Would never, never, never climb Another cherry tree. Beheld, with watery lips, the rare, Red cherries that grew high Upon a tree that chanced to be Where he was passing by. They found him lying where he fell, The trousers that he wore. Were not as strong, alas, as those His ma had labored o'er. MORAL.	great as they used to be, but mighty minds that were formerly turned into the channels of diplomacy, statesmanship, war, oratory, literature, belles-lebtres and other avocations have been largely di- verted into material paths. They are en- gaged in inventing processes for making mankind more righ and more comfortable, in constructing canals, tunnelling moun- tains, harnessing the lightning, utilizing the tides, controlling the rays of the sun, navigating the air and in a hundred other occupations that compel the agencies of nature to manister to the expanding needs and knowledge of the human raceKan- sas City Times. Oats have weakened with wheat and flour is also weak and lower. Business failures in the United States for the week were 160, as against 199 last week. Failures in July were slightly more numer- ous, 12 per cent. heavier than in June this year, but liabilities were 16 per cent. smaller, while as compared with July a year ago, the number is slightly larger and the Mabilities, owing to the inclusion of two large banks in New York, show an excess of 60 per cent. Warm weather influences limit trade in Canada, but a good fall business has been done and shipments on this account are liberal. Ontario grain crops are not turning out as well as expected, owing to dry weather, but the large number of dry weath- er enterprises going forward is expected to help general trade, while it limits the supply of farm labor. Manitoba crop prospects are good, and, with dry weather, a yield of 55, 000,000 to 60,000,000 bushels of wheat is looked for in that province. Canadian clearings for the month of July aggregate \$165,452,564, and for seven months amount to \$1,057,459,185, gains of respectively 21.3 and 17.7 per cent. over last year. Fail- ures for the month number 124, with Habili- ties of \$48,081, an increase of 15 per cent. In number, and an increase of four per cent. liabilities over July a year ago. New York, Aug. 2-R. G.
