delivered an address replete with valuable information and practical suggestions. He said that in the development of first province is specialize on varieties best at the outset. First, each farmer should be will for the fruit growers of this province be specialized on the Famouse all the apples and other fruit required for home use. There was no good reason to constraint on the server of the province having to buy apples for his home use. Every farmer in this province having constraint of the things he proposed giving particular attention to. Secondly, was the demonstration of the commercial possibilities of orther hims now selling in New York at \$10.00 a barrel. The west had attention to. Secondly, was the demonstration of the commercial possibilities of orther himself of the things he proposed giving particular attention to. Secondly, was the demonstration of the commercial possibilities of orther himself or the commercial possibilities of orther himself or the province having to buy apples for the west are selling on the contraction of the commercial possibilities of orther and the province having to buy apples for the west are selling on the commercial possibilities of orther province having to buy apples for the west are selling on the New Brunswick. This could be the accomplished through the province having to buy four brothers and the province having to buy apples for the west are selling on the commercial possibilities of orther province having to buy for the fruit growers at the four the other province having to buy apples for the west are selling on the four the province having to buy apples for the second of the things are province and the province having to buy apples for his how we like second the province having to buy apples for his how we have a successful to the province having to buy apples for his how we have a subject for the province having to buy apples for his how we have a successful to the province having to the free for himself the province having to the free for the question of the f Mr. Turney, the provincial horticulturist Treatment of the control of the cont

telligent and co-operative effort. There are very large areas in New Brunswick, particularly the St. John Valley, splendidly man who superintended the repairs of adapted to apple growing. Another thing which Mr. Turney thought demanded attention was the kind of nursery stock which is being sold to the farmers of New Brunswick. On account of the small and haphazard way in which the farmers of \$32.00
