

158203

347 Bay Street, Toronto,  
November 22, 1932.

Dear Mr. Oakley:

I duly received your letter of 19th with enclosure, being a thesis by Mr. B. E. Campbell on the subject of "Canadian Railway Electrification".

I do wish I could get time to study this now, but unfortunately it is simply impossible. Recent heavy responsibilities put upon me rather more than occupy my time at present.

It strikes me that Mr. Campbell should have presented this pamphlet to the recent Royal Commission enquiring into Railways. Naturally the Government cannot very well address itself to the task of Railway organization on this line. It is, in fact, not the Government's initial responsibility.

I hope to get to the pamphlet before a great length of time.

Yours very truly,

Geo. Oakley, Esq., M. L. A.,  
Parliament Buildings,  
Toronto, Ontario.
