wishing to go hunting deer of any kind during the next open season, must apply for their license on or before November 30th, 1909. After that date, no licenses will be issued.

## STOCK ACCOMMODATION

Finding the first buildings erected for the live-stock show at the Alaska-Yukon-Pacific Exposition, which will be held from September 27 to October 9, completely inadequate to handle the animals entered, the department of works at the Exposition has found it necessary to double the size of the barns. The new structure will be 120 feet in length, by 50 feet in width, and it will be completed in time for the opening of the live-stock show on September 27.

In all 2,182 animals have been entered by the two hundred and fifty breeders represented. The stock is coming from practically every State of the United States and every Province of Canada. Many of the breeders have imported the best foreign stock to exhibit in the hope of drawing down prizes with European animals. In the show there will be 288 horses, 899 cattle, 323 swine and 872 sheep.

In the horse division, as is usually the case, the Percheron class leads in the number of animals entered, with 65. The cattle entries, numbering 699, are well distributed between the various breeds, Ayrshires leading with 102, Red Polled second with 91, and Shorthorns with 85.

In the swine classes, Poland Chinas lead, with 78 animals on display. There are 872 sheep entered, the Rambouillet class comprising 116 of these.

## Questions & Answers

### VETERINARY

Enquiries dealing with matters of a veterinary nature are answered through our columns by a competent veterinarian free of charge to bona-fide subscribers. Details and symptoms must be fully and clearly stated on only one side of the paper. Full name and address of the writer must accompany each query, as a guarantee of good faith but not necessarily for publication. When a reply is required by mail one dollar (\$1.00) must be enclosed.

### CAUSE OF DEATH OF DOG

A coyote hound died rather inexplicably. He had not been seen for two days, and was found dead beside a hay stack. He was lying very naturally; no signs of struggling; had bled a little at the nose and mouth, and was much swollen along the back between the shoulder blades. This swelling was very much like black-leg, there being air between the skin and the flesh. His neck also was very swollen. He was ten years old, very active, and I think he must have died of bloat, brought on by the extreme heat, as poison seems out of the question. Can you offer any suggestion as to the cause of death? He was very fat at the time.

M. L. F.

Ans.—The only possible way to determine the cause of death in this case would be by post-mortem examination, including the stomach, bowels, and other internal organs. The swelling along the back and between the shoulders, together with the bleeding from the mouth and nostrils, points to an injury such as might result from being run over, or from some heavy object having fallen on his back.

### PUMPKINS FOR SWINE

Will you please give the value of pumpkins per ton as a feed for hogs?

B. C.

R. M.

Ans.—One hundred pounds of pumpkins would contain 9.1 lbs. of dry matter, 1.0 lbs. protein, 5.8 lbs. of carbohydrates, and .3 lbs. of fat. Ninety per cent. of the pumpkin is water, consequently it has a feeding value for swine about equal to mangels. A ton of pumpkins would be worth about one-eighth as much as a ton of shorts.

### HEIFER WITHOUT MILK

Three-year-old heifer, calved last spring, did not have any milk when

## Horse Owners! Use

### EUCLID FOR SUFFRAGETTES

(1) Parliament Square is a four-sided figure, which has all its sides policemen and all its angels inspectors.

(2) A police witness is that which lies evenly on all points.

(3) A 'rush' has magnitude but no point.

## Surgeon's Opinion OF KNIFE FOR PILES

Operating often a fad—The modern way of curing piles is with Dr. CHASE'S OINTMENT

Sir Henry C. Burdett, K. C. B., of London, Eng., in a recent address, said: "What we want are surgeons, who, with wisdom to be conservative, have courage to protest against the growing tendency to put a knife into everybody on the smallest possible pretext."

Too many doctors have a desire to use the knife at every opportunity. The rewards to them are rich, but think of the suffering of body and mind, the enormous expense and the risk of the life itself. An operation should be the last resort, for, in spite of the glowing promises, the results are often very disappointing.

Many a sufferer from piles has been cured by the use of Dr. Chase's Ointment, after operations have failed. Hundreds of thousands have escaped operations by using this treatment first, and, thereby, obtaining cure.

Mr. Arthur Lepine, school teacher, Granite Hill, Muskoka, Ont., writes: "For two years I suffered from bleeding piles, and lost each day about half a cup of blood. I went to the Ottawa General Hospital to be operated on, and was under the influence of chloroform for one hour. For about two months I was better, but my old trouble returned, and again I lost much blood. One of my doctors told me I would have to undergo another operation, but I would not consent."

"My father, proprietor of the Richelieu Hotel, Ottawa, advised me to use Dr. Chase's Ointment, and two boxes cured me. I did not lose any blood after beginning this treatment, and believe the cure is a permanent one. I gratefully recommend Dr. Chase's Ointment as the best treatment in the world for bleeding piles." 60 cents a box at all dealers, or Edmanson, Bates & Co., Toronto.
