DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO.,
Toledo, O.
Sold by druggists, 75c.
Take Hall's Family Pills for catarrh.

NORSE-AMERICAN ENGLISH.

There is one European country where the United States vernacular, or something very like it, is widely spoken. Hosts of Norwegian young women have been in domestic service in America, and a good many Norwegian young men have sought fortune there with the result that transatlantically accented English is not at all an uncommon accomplishment in Norway. I remember one carriage driver of his remarks with "You bet!"—London Chronicle.

VERY REMARKABLE CURE OF DIARRHOEA.

"About six years ago, for the first time in my life I had a sudden and severe attack of diarrhoea," says Mrs. Alice Miller, of Morgan, Texas. "I got temporary relief, but it came back again. Finally I moved to Bosque county, our present home, and one day I happened to see an advertisement of Chamberlain's Colic, Cholera and Diarrhoea Remedy with a testimonial of a man who had been cured by it. The case was so similar to my own that I concluded to try the remedy. The result was wonderful. I could hardly realize that I was well again, or that I had been so long suffering. I suffered so long, but that one bottle of medicine, costing but a few cents, cured me." For sale by All Druggists.

Respected the Law.

Whether an epithet is libelous or not is determined by the law alone. There is a pleasant story of an English gentleman rushing into his friend's chambers in Lincoln's Inn and exclaiming: "Quick! Quick! That scoundrel Jones is in Chancery lane, and I want a list of all the abusive names I can call him without risk of prosecution!"

Scorched.

Crabbe—You needn't call any more. I'm going to try another laundry. Laundryman—Why, what's the matter? Weren't your shirts and collars well done? Crabbe—Yes, too well done. I don't like them so brown.

CHOLERA INFANTUM.

This has long been regarded as one of the most dangerous and fatal diseases to which infants are subject. It can be cured, however, when properly treated. All that is necessary is to give Chamberlain's Colic, Cholera and Diarrhoea Remedy and castor oil, as directed with each bottle, and a cure is certain. For sale by All Druggists.

Cleanses Brickwork.

Any brickwork cleaned with ammonia and water and then carefully dried will be wonderfully brightened by the process.

Dogs to Suit the Occasion.

Fifty years ago the British minister at Dresden, Mr. Forbes, had three little dogs of the Pomeranian breed, one black, one gray and one white. When the court was in mourning he went out with dog No. 1, when it was in half mourning with dog No. 2 and when all was going well with dog No. 3.

ONE OF THE VILEST DISEASES.

Is catarrh which first attacks the nose and throat and finally spreads all through the system. The one sure cure is fragrant healing Catarrh Remedy which is sent by the air you breathe direct to the root of the trouble. Mr. T. Y. MacVicar, of Yarmouth, suffered for years from catarrh and says: "In my long experience with this loathsome disease I never used any remedy that relieved and cured so promptly as Catarrh Remedy. When my nostrils were so stuffed up that I couldn't breathe I found a few inhalations of Catarrh Remedy was sufficient to clear away the mucus, and I was free from the disease entirely. Use only Catarrh Remedy. Complete outfit \$1.00; trial size 25c."

Human Blood.

Seven hundred and seventy-nine parts in every thousand of human blood are water.

A Terrapin Farm.

A terrapin farm consists of canals with narrow ridges of land between. The ends of the canals are so secured that it is impossible for the terrapin to escape, and the entire farm is surrounded by a high fence.

GOVERNMENT PHONES

INNOVATION ON TEMISKAMING RAILWAY WHICH PROVES USEFUL.

An Aid in Constructing the Road and Beneficial to Settlers—Great Activity in the Temiskaming District—Mile of Track Laid Daily Just Now—College Boys in Camp Learning Frontier Life.

Mr. T. G. Southworth of the Colonization Department, who has just returned to Toronto from the Temiskaming district, brings reports of great activity of all kinds going on there. The railway contractors are working double tides, and a mile a day is the ordinary track-laying record. One or two soft spots have delayed progress, and a trestle or two kept back work for a time, but there was no serious trouble. The contractors are at work on the grade north of Liskeard, and the line will

TEMISKAMING RAILWAY AND TELEPHONE

be ready to Liskeard by the fall. The work everywhere is being expedited by the telephone line, which is being built, and owned by the Government, and which follows the railway. All train orders are sent over the telephone, no telegraph system being employed. Telephones are also placed in the gravel pits, and elsewhere where required.

The telephone runs from North Bay to Temiskaming, and as far beyond as the railway has been carried, and there is also a line from Liskeard to Hallsbury. The innovation is one of the most practical and valuable that could be thought of in connection with the construction of the railway, and its utility to the settlers in the new district gives rise to much comment. The telephone will be carried north along with the railway, and will prove to be the nucleus for a Government-owned system in the north country.

At Temiskaming there are two interesting camps, one in charge of Prof. Cochrane, physical instructor of Upper Canada College. There are about 35 boys here, aged from 10 to 16, who are taught to swim, spar, chop wood, fish and adapt themselves to frontier life. A similar camp for boys from the United States is conducted by Dr. S. Gregg Clarke of Asheville, N.C. The boys are from various schools and colleges, and pay a fixed sum for their outing.

The first issue of The Temiskaming Herald, a four-page paper, has just made its appearance. Prof. John Sharpe is the editor, and the printing and get-up is exceedingly good. A sum of \$2,000 has been voted by the Victorian Order of Nurses towards the erection of a hospital at New Liskeard.

Another visitor in the north country was Fruit Farmer McIntyre of Niagara, who has just returned from two months' prospecting, having gone as far north as the Abitibi River. He had some friends with him, and made a first hand study of the country to obtain an opinion of its agricultural possibilities.

He speaks highly of the land along the valley of the Black River, which he examined carefully, and commends as a home for permanent agricultural settlement. The land is of good quality, and leads to it is better, the spruce being of larger dimensions.

The party camped for some days at Iroquois Falls, a magnificent water power on the Abitibi. The water power of the railway will most probably follow the Black River course on the way to James Bay.

Climatic Paradox.

It is not generally known that at certain seasons of the year it is warmer in Greenland than in southern Europe. And this occurs during the long sunless winter of the Polar regions. The cause which leads to this is not unknown in other countries. Thus in Switzerland a warm dry wind, called the foehn wind, at times blows down from the snow covered mountains in autumn and winter, suddenly melts and carries off the snow, drying up the atmosphere.

In northwestern Canada there is a similar wind called the chinook wind. So in Greenland at irregular intervals a warm wind blows down from the snow covered interior, bringing an extensive thaw in January and February. As a result we have the extraordinary fact that during extraordinary days in November and December in one year it was warmer in Jacksonville, in latitude 69 degrees 20 minutes, than in northern Italy. Upmanvik, another town of Greenland, was during part of the time, warmer than the south of France.

Mending Table Linen.

It is well to keep on hand a yard or two of damask from which to pull threads for mending table linens. When these are bought (as they commonly are nowadays) by the pattern there is no chance for the "trimmings" which used to fall to the lot of the buyer in getting them in shape. The savings from this class of goods make a dam which is practically unobtainable after laundering.

THE VALUE OF REPOSE.

Restless Women Constantly Waste Their Strength and Energy.

If women would learn to sit still when they sit, to stand still when they stand and to lie still when they lie they would save in a week as much strength as most women devote to a hard washing.

But woman when she sits twiddles her fingers, taps her toes on the floor, rocks nervously and without rhythm; rhythm produces a restful sensation, but she doesn't rock easily and evenly, she jerks the chair back and forth irregularly. When she lies down she continually moves her hands and feet, and even resorts to wriggling her toes, for no other reason under the sun than that she is restless and does not know how to rest without expending more strength in the process.

These physical indications of weariness express not only weakness of the body, but weakness of the mind. The woman who constantly taps the floor with her foot while she is sewing or while she is talking with a caller is mentally unstrung. Her mind is wandering. This is always noticeable. Whenever a woman gets in earnest she forgets to tap the floor with her foot, though she may stamp the floor with her heel.

The tapping woman is not capable of settling down to a long and complicated problem of any sort. She is easily swayed, easily disturbed, easily turned from a line of thought.

If any one wishes to stand for the strength which she hopes she possesses let her remember that all unnecessary physical movements express both physical and mental weakness just as clearly as a wandering tongue discloses a lack of thought.—Pittsburg Press.

AN UMBRELLA STAND.

One to Serve the Double Purpose of Use and Ornament.

Where space is at a premium it is something of a problem how to satisfactorily dispose of the family stock of umbrellas. To be sure, there are umbrella stands by the score, but they do not always meet the requirements, and then, too, a collection of umbrellas in the average household can hardly

ORNAMENTAL UMBRELLA STAND.

be classified as ornamental. The accompanying illustration suggests one method of solving the umbrella problem. The design is that of a combined umbrella and plant stand in wickerwork, but the wood is immaterial. Such a stand could advantageously be placed in a corner of a room or hallway and with a plant or bit of pottery on top serve the double purpose of use and ornament.—Brooklyn Eagle.

Salt in Poulticing.

Salt serves admirably when it is used to apply either dry or moist heat for a considerable time. The virtue of an ordinary poultice is due to moist heat. Now, the great drawback to such a poultice is that it soon gets cold. If we place over it a bag of very hot, dry salt the poultice will retain its heat for hours provided the part be well covered. A flannel bag will suffice. The salt should be heated on a plate placed in the oven or on a stove. More warmth will be quite useless. The heat should be too great for the hand to bear. Between the poultice and the salt bag a layer of flannel should be placed. Another way of using the salt bag is to lay the fierce heat pass away and to apply the bag with out any poultice over a layer of flannel.

The Programme Plan.

Wouldn't it be nice if you could have a neat little programme mapped out every month in the year telling just what you ought to do that particular month in order to be the best and most scientific housekeeper in the world? A woman's magazine has hinted that such a thing may be done, and we certainly hope to live to see it tried. The woman who realizes that she can do certain things better one month than another is on the road to success, and success in the case of a housekeeper spells many things, among them economy of time, money and strength. The programme idea wouldn't be a bad one, even if you made it yourself.—Exchange.

MAY HAVE KIDNEY TROUBLE.

IF YOU back aches and you suffer from dragging pains it is an evidence of diseased kidneys. Get Ferrozone at once and take it regularly. Ferrozone makes kidneys sufferers feel better at once. "I was bothered a great deal with my kidneys last year" writes S. G. Denton, of Everett, "but got quick relief from Ferrozone. My trouble manifested itself by pain in the back, dull heavy feeling and constant headache. I quite recovered after using a few boxes of Ferrozone which has given me more strength and better health than I ever had before. I can recommend Ferrozone as a positive cure." Price 50c at all druggists.

Tibet.

Tibet is larger than France, Germany and Spain combined, but has only a population of 6,000,000.

Rose Leaf Pillows.

Rose petals make a delightful filling for sofa pillows. Save them from withered bouquets or from fresh flowers and dry them. They may be treated as for potpourri or used with their own delicate perfume only.

New England's Dark Day.

May 19, 1780, was the "dark day" in New England. Darkness commenced in the forenoon and covered the country from New York to Maine.

TO QUICKLY CURE BILIOUSNESS.

Use Dr. Hamilton's Pills of Man-drake and Butternut. They cleanse the stomach and bowels, assist the liver in removing bile, and cure thoroughly. Use only Dr. Hamilton's Pills. Price 25c.

STEAMER PENGUIN LOST.

Fifth Expedition in Search of "Krugers Millions" Comes to Grief.

Durban, Aug. 16.—The coast steamer Penguin has been wrecked and twenty-five persons, who were on board of her, were drowned. The boat was the only survivor.

The Penguin was chartered to search for "Krugers millions," alleged to have been sunk with the steamer Zululand, off the coast three years ago. Four previous expeditions with the same object in view has ended disastrously.

WHY DO WOMEN SUFFER

Such pains and endure the torture of nervous headache when a quarter of a bottle of Nervine which never fails to relieve. Just a few drops of Nervine in sweetened water cures nervous or sick headache, relieves heart palpitation and makes you feel better immediately. Nervine can't be beaten for quickly curing stomach and bowel troubles and should be kept in every home. It's good to rub on for external pain and excellent for inward use. Sold in large 25c bottles.

Milk and Bright's Disease.

A physician suffering with Bright's disease and weighing 155 pounds began to restrict himself exclusively to a milk diet, taking a quart at each meal, or three quarts daily. Soon no traces of his former ailment was perceptible. He gained thirty pounds in flesh, and this notwithstanding constant attention to professional duties both day and night.—Chicago News.

When the devil lets a man go he always gives him a return ticket.

C. C. RICHARDS & CO.

Dear Sirs,—I have great faith in MINARD'S LINIMENT and last year I cured a horse of Ring-bone, with five bottles.

It blistered the horse but in a month there was no ring-bone, and no lameness.

DANIEL MURCHISON.
Four Falls, N. B.

Strongly Recommended.

Lady (engaging a page boy)—Well, how soon can you come? Page (readily)—At once, mum. Lady—But surely your present mistress won't like that. Page (brightly)—Oh, yes, she will, mum! She'll be only too glad to get rid of me.—London Punch.

Contentment.

"Contentment has one advantage over wealth," said the philosopher. "What's the explanation?" "People don't try to borrow it."

The eye of the master will do more work than both his hands.—Franklin.

FARM LABORER'S EXCURSION.

Manitoba and Assiniboia. Chatham \$12 to Winnipeg, from which point Farm Laborers will be distributed free of charge, on presentation of proper certificate to points West of Winnipeg in Manitoba or Assiniboia, but not West of Moosejaw, Yorkton or Estevan.

Tickets on sale and good going Aug. 30th. Apply to
W. E. RISPIN, C. P. & T. A.
115 King Street.

\$50.00 TO CALIFORNIA AND RETURN.

Via the Chicago, Union Pacific and North Western Line, from Chicago, August 15th to Sept. 10th. Choice of routes going and returning. Correspondingly low rates from all points in Canada. Two trains a day from Chicago through without change. Daily and personally conducted tourist excursions. Write for itinerary and full particulars regarding special train leaving Chicago, Aug. 18th and 25th.

SELECTIONS

TO COUNT BY EIGHTS.

Society For the Propagation of the Octimal System.

A society is about to be formed in England for the propagation of what is called the octimal system, or counting by eights.

The most natural to multiply and divide is to double or halve. It is simplicity itself to take one apple (or anything you please) and multiply it by placing another by its side; you multiply again by adding two more, and so you go on doubling. In the same way you divide by halving.

Now, in the decimal system it is not possible to do anything so neat as that. You must get to your unit, or base, of ten, and it is impossible to do that by the simple process of doubling the low figures. You can certainly halve one in the same way as in the new octimal system, but if you take ten you get down to two and a half very soon—a very broken figure—and it gets worse as you go lower.

Not so with the eight. It was contended by its opponents that the process of dividing or multiplying by simply shifting the point is not possible. In decimals, thirty means thirty, but 8.0 means three, which is an easy method of dividing by ten, but how would this be in the new enumeration?

To this the octimalists reply that the figure of ten is quite arbitrary, that the most natural figure is eight and that, if we had been taught to count by eights, we should have experienced no difficulty.

In that case thirty would be equal to twenty-four, while 3.0 would be three, as at present. Further—and this is where they think they score—3 would be three-eighths, not three-tenths, which they stigmatize as a very difficult division to obtain naturally.

It is all very well when we have it marked out for us on a scale, but just think of the difficulty of splitting an apple into ten equal parts and then compare that with the simplicity of obtaining eight parts by merely halving!

Supporters of the decimal system say that the human hand was the basis of calculation, there being ten digits, but octimalists point out that there are only eight fingers; that the thumb is a special part of the hand.—Pearson's Weekly.

Artificial Snails.

As escargots, or snails, are not much eaten in this country, the discovery that artificial snails are made will not worry American epicures. In Paris it is different. Public knowledge of this enterprise came about through the suit brought by a Paris workman against his employer for injuries received in manipulating a machine for fabricating snails. It was explained that the employer bought empty snail shells from the dust men and ragpickers. Having cleaned out the shells, the defendant and his people filled them with "that is to say, lights, or cigs, or meat. This soft, spongy stuff before being crammed into the shells was cut into corkerew shape by very improved machines. When the shell was filled some liquid fat or grease was poured into it, and the trick was done. The fabricated snails were sold usually at 20 centimes the dozen.

Balked on Their National Hymn.

King Edward, while visiting at the residence of one of his subjects recently, saw proof that not many Englishmen know the words of their national anthem. He was waiting at the station for his train when a few of the ultraloyal began to sing "God Save the King," but each in succession came to a sudden pause and lamentably broke down. A desperate attempt failed most ignominiously, greatly to the amusement of his majesty, who vainly tried to conceal his smiles under cover of a parting chat with his noble and slightly embarrassed hostess.

The poet who says he makes money must be a tuncful liar.

Change of Time.

The poet who says he makes money must be a tuncful liar.

THE STEAMER

City of Chatham

Will make her regular round trip from CHATHAM to DETROIT every Monday and Wednesday

Leaving Rankin dock, South Chatham, at 7:30 a. m. and returning leaves Detroit (foot of Randolph St.) at 3:30 p. m. Detroit time, or 4 o'clock Chatham time.

At one way trip leaving Thursday morning at 9:30

Will also make round trips from Detroit to Chatham

Every Friday and Saturday Leaving Detroit, foot of Randolph St., at 8:30 p. m., Detroit time, or 9 a. m., Chatham time, returning will leave Chatham at 3:30 p. m., Detroit time, or 4 p. m., Chatham time, leaving in Detroit about 3:30 p. m.
