But whether that be true or false it is a fact that the stone was thought to be of sufficient worth to arouse a desire in the breast of Edward I. to have it to use in his own king-dom, and in the year 1296 he sent an expedition into Scotland for the pur-pose of getting it and they carried out his instructions to the letter, as was customary in those days. Since that time the "Stone of Destiny" has been hid in the sent of the Cor-onation Chair of Engiand, where nobody ever sees it but the crowned heads and they only sit on it, and just for a few minutes in a life time at that.

This done, he backed out of the room. But as soon as he was gone the el-derly woman leaped from her bed in the most sprightly manner, ran to the drawer, got the will, and threw it into the fireplace, where it went to ashes and smoke. Children Cry for Pitcher's Castoria.

A Good Sentiment. The first law of the kingdom of heaven is that, every man ishall do all the good he can in all the ways he can to all the people he can. This is the law which glorifles work and gives the workers a patent of nobli-ity which surpasses any a monarch can bestow. It is the only principle that is not sordid, the only one that makes life worth living, the one, in-deed, which is the straightest, and by far the most certain course to world-ly success.-Montreal Witness.

What? Not Recognized! A writer in Back has attempted to answer the question as to what is the difference between a newspaper-man and a journalist, by saying a newspaper-man wears two shirts a week, while a journalist wears one shirt two weeks. The Euffalo Ex-press objects to this definition, and reverses the order of the shirts. The Century dictionary defines "journa-list," but fails to recognize a news-paper-man. That leaves the question still open. Perhaps some of our rea-ders will be able to enlighten the new p.per world as to the correct de-finition of these two terms.-News-paperdom.
