

THEY'LL GIVE YOU
Great Comfort and Splendid Service.

We refer now to our

AMERICAN SKIRTS.

Skirts among this Lot up \$2.50 each,
now all reduced to one price,

\$1.50
each.

These Skirts spell coolness and comfort for active Ladies, and comfort spells health, and the whole proposition from start to finish spells satisfaction for you at a very moderate cost.

SEE THEM, LADIES.

S. MILLEY.

The "Yale" at Labrador.

Small Craft Which Was in Halifax Has Arrived at Indian Harbor.

News was received at Greenwich, Conn., Monday, of the arrival at Indian Harbour, Labrador, of John Rowland, the young Yale man who had the 40 foot hospital tender Yale built along lines suggested by himself, raised the cost of construction by personal subscription, and then, with a crew of students, took the boat from Boothbay, Me., and turned it over to Dr. Grenfell, the Labrador missionary, as a wedding present to be used in the Labrador work.

Young Rowland, who is 21 years old, is a son of George Rowland, a prominent New York business man, whose country home is in Greenwich, and a brother of Henry Rowland, the novelist.

The Yale was finished on June 15 and young Rowland accompanied by a Yale Junior by the name of Twombly and another Yale man, together with a young man from Labrador, who had

been at Pratt Institution, Brooklyn, joined the vessel. On June 18 they sailed, taking a pilot with them. They reached Halifax July 9. Here the pilot left them and they had to get another. After a rather bad trip, during which all hands were pretty well worn out, they arrived at Battle Harbor, Labrador, July 19. It was found out there that Dr. Grenfell was at St. Anthony, Nfld., and they sailed to that place.

Here they found that Dr. Grenfell was anxious that the boat should be taken at once to Indian Harbor, about 200 miles north of Battle Harbor. They sailed at once, arriving there Monday night. The Yale is 44 feet 8 inches over all, and 34 feet on the water line. She has a width of 12 feet and a draft of 6 feet 8 inches. She is ketch rigged, with an auxiliary engine, using kerosene, as gasoline cannot be obtained on Labrador. Her hull is of the double end type.—Halifax Record, August 4.

Kitchener Once Named to Succeed Sir E. Gorst.

London, August 3.—"What does the Government intend to do with Lord Kitchener," a well-informed official at Whitehall was asked a few days ago.

"I give it up, but," added the official, "did you know that Lord Kitchener nearly went to Egypt to take Sir Eldon Gorst's place as British diplomatic agent and consul-general? It is a fact."

"Mr. Roosevelt upset that arrangement, however. Everything had been fixed; Kitchener had been offered the post and had accepted it, when Mr. Roosevelt, in his Guildhall speech, laid down a course of action in Egypt. So the Government decided, at least for the present to keep Kitchener at home. This decision, of course, was due to the fact that the Government did not wish to jump at Mr. Roosevelt's plan of sending a man of 'blood and iron' to Egypt."

"So you cannot tell what work will be found for the great soldier?" He might be sent to Constantinople as Ambassador, for we need a strong man there. England has been losing ground with the Young Turks for several months.

King Pins Medals on Miners' Breasts.

Three Score Heroes of Colliery Disasters Receive Decorations From the British Ruler's Hands at Palace.

London Aug. 2.—King George, at Marlborough House to-day, in presence of the Home Secretary and other Government officials, decorated sixty-two miners for conspicuous gallantry in saving or attempting to save life in recent colliery disasters, presenting them with King Edward medals.—a decoration instituted by the late King for heroism in mines.

After addressing words of praise to the recipients and complimenting them for their bravery, the men were presented singly to the monarch, who personally pinned the medal on the breast. More than fifty of the men won their decoration by bravery in the Whitehaven pit disaster, when more than one hundred miners were entombed. It occurred just after King Edward's death.

Nine seamen also received medals for conspicuous gallantry in saving life at sea.

LARACY'S have just received direct from the manufacturers per "Droning Maud," from Antwerp, Tumblers, Glasses, Decanters, Goblets and Fancy Glassware. Selling at our usual low prices at LARACY'S, 345 and 347 Water Street, opposite Post Office, may 14, 11.

Collins' Sale Price, 50 cts.

Regular 75c.;

Collins' Sale Price, 55 cts.

P. F. COLLINS,

THE MAIL ORDER MAN,

340 and 342 WATER STREET.

The Archbishop's Return.

"Caed Mille Faltthe."

This greeting, the beautiful and spontaneous outburst of the Irish heart when the Lord of Hosts and King of Heaven and earth descends from His Throne on high during the Holy Mass, met His Grace the Archbishop on Sunday last, as he returned from his travels in other lands to his native shores, and to his people over whom long may he watch and guide. "Caed Mille Faltthe"—"A hundred thousand welcomes"—a message sincere and true floating from the stately towers of the massive Cathedral, breaking forth from the hearts of the children on far away shores, the spirit of the parent—the true Gael—from whom the faith has, through the ages, descended as the most priceless treasure on this side of the grave.

Never has the beautiful display of last Sunday been surpassed, and truly the Archbishop's heart must have rejoiced at such a whole-souled display of loyalty and of love.—Com.

Arrest of a Boy.

A boy who had been working at a tea agency in the city was arrested yesterday at the instance of his employer for obtaining money under false pretences. The employer, who discharged him a few days ago, says that the boy after leaving his services went about town collecting money in the name of the tea firm. He was held at the lockup all night.

Sweeping the Streets.

Next Thursday the City Council will adopt a new plan of sweeping Water Street by which they hope to avoid the raising of so much dust, as is the case when the horse broom sweeper is used. They will employ men to do the sweeping in the old fashioned way, laying the dust with water as they go along with the work. Anyone who happens to come down on Water Street about 6 o'clock in the morning will easily realize the necessity for a change. The dust raised is intolerable.

Will Open New Street.

The City Council with Engineer Ryan visited the rear of Notre Dame Street yesterday and decided to open up a new street, which would run from Carter's Hill to Barte's Hill parallel to New Gower Street. This is a very congested district and there are several old tenements there that should be torn down long ago. Besides, it is a dangerous and difficult locality in case of fire breaking out there. The Engineer has been ordered to draw up plans for the next meeting.

A Reply to Athlete.

Editor Evening Telegram.

Dear Mr. Editor,—Athlete says: "Some of the men who trained will have to abandon the Marathon if it is increased to fifteen miles." Well, now, Mr. Editor, I for one think it was understood that our annual Marathon was to be increased every year until we had reached the full Marathon distance, viz., 26 miles 385 yards. The full distance is not too much for a Newfoundland runner, and as the Committee have decided the distance to be covered (15 miles) they should keep to it, as several young men have practised for that distance and already covered the course.

Thanking you for space, Mr. Editor, I remain,

Very truly yours,
"YOU CAN'T CATCH ME."
August 9th, 1910.

Constable Green returned to Bay de Verde by the s.s. Fogota to-day.

Nutritive Hypophosphites

When a person feels "blue"—"all tired out"—doesn't feel like doing anything—cannot concentrate his mind on his work—feels weak mentally and physically—doubts his powers—complains of poor appetite and sleeplessness—suffers from headaches—then his nervous system is run-down and demands a good up-building tonic.

Nervous exhaustion is a modern disease, caused by too close attention to business, overwork, worry, devotion to trying family cares overstudy, etc.

Nutritive Hypophosphites forms the best nerve and brain food known, and have restored thousands of sufferers to health. Large bottle, \$1.00.

The more you trade here the better you like this store.

Mail orders promptly attended to.

A Win for the C. L. B.

The C. L. B. won the match by 3 goals to 1 against the Nfld. Highlanders at the brigade match on St. George's Field last night. The weather was very suitable for a hard game and there was a fairly large attendance. Just before the half time call the C.L.B. scored the first goal. Shortly after play was resumed the Highlanders equalized by getting No. 1. After a lively exhibition of play the C.L.B. scored up the second, and a few minutes before full time was called they secured No. 3. The match to-night will be M.G.B. vs. C.C.C.

Making a Newspaper.

Fascinating Series of "Daily Mail" Pictures.

Many thousands of people have already seen the vivid series of moving pictures now being presented in London and the provinces, showing in wonderful detail all the steps that go to the making of The Daily Mail. These pictures, taken stage by stage, from the felling of the spruce trees for the making of the paper in Newfoundland, to the publication of this journal in London and Manchester, give the average man, perhaps for the first time, an adequate idea of the mechanical processes through which a great daily newspaper passes ere it reaches the breakfast tables of its readers.

The opening scene is a logging camp of workmen employed by the Anglo-Newfoundland Development Company at Grand Falls, Newfoundland. The fallen giant trees are trimmed, cut into lengths, and dragged through the forest to the river for the ninety-mile water journey to the works at Grand Falls. Impressive pictures are shown of the great cataract, and of the works where is installed the most complete paper-making plant in the world.

Record Shipment of Paper.

At the works the logs vanish into a long row of machines, emerging as a watered mass of pulp. Then comes the packing of the finished paper and its despatch by train to the wharf for passage to England. One of the incidents shown is the arrival of the biggest shipment of paper ever landed in England, the 2,343 tons brought into the Thames by the Tritonia.

The fascinating operation of setting type by linotype machines, the casting of the plates, and the threading of the huge, five mile reels of paper on to the great printing machines which will print and automatically count 60,000 copies of The Daily Mail per hour, are next shown.

No more enthralling series of moving pictures have ever been presented. They will be on view at every centre throughout the country.—Daily Mail.

Minard's Liniment Co., Limited.

Gentlemen,—In June, 98, I had my hand and wrist bitten and badly mangled by a vicious horse. I suffered greatly for several days and the tooth cuts refused to heal until your agent gave me a bottle of MINARD'S LINIMENT, which I began using. The effect was magical; in five hours the pain had ceased and in two weeks the wounds had completely healed and my hand and arm were as well as ever.

Yours truly,
A. E. ROY,
Carriage Maker.
St. Antoine, P. Q.

Placentia Notes.

On Tuesday morning Mr. Michael Hendrick was called to the Great Beyond. Mr. Hendrick had attained the ripe old age of four-score and two. Until a few weeks before his death, he was enjoying very good health. About a month ago while attending to his gardens, he was suddenly seized with a fit of paralysis, and from then until his heart ceased to beat, he slowly got worse, and we know what happened.

Mr. H. leaves a widow, two brothers, besides many friends and relations to whom sympathy is extended by all. On Thursday he was confined to mother earth to await the trumpet call.

Glancing at the second page of the Daily News of Aug. 5th, the first thing we see is that two more promising young lives are cut off from the world by drowning in Quidi Vidi Lake. We further see that one of the victims is a son of Dr. Lloyd, Editor Evening Telegram, the other, a nephew of Mr. M. Martin, also book-keeper of the Telegram staff. Only a few days ago Mr. P. K. Devine, also of the Telegram, lost a promising young son by drowning. The spear of the Death Angel has with great swiftness stung the Telegram staff during the past few weeks, and to Messrs. Lloyd, Devine and Martin we extend our sincere sympathy in their sad hour of bereavement.

CASTLE HILL.

Farmer Ruby Pleads for Cheap Lime.

Editor Evening Telegram.

Dear Sir,—In the Daily News of August 5th is a letter from Mr. J. F. Downey, he writes of my experimenting with alfalfa: I have grown small lots different times. It always grows well with wood ashes or lime. It requires a porous sub-soil as its roots penetrate very deep. On the 30th of July I sowed a small plot. I will report the results at the Agricultural Show. I have grown it two feet high on well drained bog land. Dr. Grenfell is experimenting with some hardy sorts of Alfalfa in Canada Bay. It would be well to find out how it succeeded with him. Alfalfa is a Legume. It belongs to the clover family, and all Leguminous plants require lime. It would be useless to sow Alfalfa here without lime in some form. Mr.

Downey says if we are to make cattle raising the profitable industry that it should be, comes the question of this securing of the most nutritious feeds at lowest cost must be of first importance to everyone interested therein. Now, you are coming to the point, Mr. Downey. This is why I am always pleading for lime that will cause the clover and Alfalfa to thrive. We will then have the best of cattle feed and still be improving the fertility of the soil. From Blacksburg, Montgomery County, Virginia, Experimental Station, in Bulletin 187, there is valuable information about lime. We should have a lime kiln built and start burning lime this fall. Who will move in the matter in order that we may boom agriculture?

Yours truly,
SAMUEL RUBY.

A GENUINE SURETY BOND GUARANTEE
PACKED INSIDE EACH ROLL OF

CONGO ROOFING

NEVER LEAK

Congo is the only Ready Roofing carrying the National Surety Co.'s bond. It carries with it terms and conditions that make it especially attractive to anyone who must consider the roofing question.

For 10 years you can rest easy about your roofs if covered with 3-ply Congo, and we know that it is probable you will get even longer service out of it.

The Surety Company is issuing these bonds, and back of them is their two million dollars of assets. It is a matter of keen satisfaction to us that they were willing to stand behind Congo Roofing. You are immune from any responsibility other than giving the roofing ordinary care. Write to-day for samples of Congo and full information. Remember, that with every roll of Congo you get a genuine Surety Bond.

GEORGE KNOWLIN & CO.
St. John's, Newfoundland.
