

TWO WOMEN TESTIFY

What Lydia E. Pinkham's Vegetable Compound Did For Their Health—Their Own Statements Follow.

Haliburton, P.E.I.:—"I had a doctor examine me and he said I had falling of the womb, so I have been taking Lydia E. Pinkham's Vegetable Compound and it has done me a lot of good. All the bearing-down pains have vanished. I have gained ten pounds in weight, the discharge is all gone, and I feel better than I have for a long time. I think any woman is foolish to suffer as I did for the sake of a few dollars."

"You can use my letter as a testimonial. It may encourage other poor women who suffer as I did to use your Vegetable Compound."—Mrs. GBO. COLLICUTT, Haliburton, Lot 7, P.E.I.

Read What This Woman Says:
New Moorefield, Ohio.—"I take great pleasure in thanking you for what your Vegetable Compound has done for me. I had bearing down pains, was dizzy and weak, had pains in lower back and could not be upon my feet long enough to get a meal. As long as I laid on my back I would feel better, but when I would get up those bearing down pains would come back, and the doctor said I had female trouble. Lydia E. Pinkham's Vegetable Compound was the only medicine that helped me and I have been growing stronger ever since I commenced to take it. I hope it will help other suffering women as it has me. You can use this letter."—Mrs. CASSIE LLOYD, New Moorefield, Clark Co., Ohio.

WATFORD, NOVEMBER 8, 1912.

NOTE AND COMMENT.

The Duke of Connaught has won his way among Canadians through his democratic manner and that certain characteristic of his brother, the late king, and revered mother, by which they are all held in affectionate remembrance.

George Brown's statue has reached Ottawa. It is a fine effigy of heroic size, cast in bronze. The statue will not be erected in time for the opening of parliament because the pedestal has not been cut. It will be erected near the Mackenzie statue on Parliament Hill, and later will be joined by McGee, Lafontaine and Baldwin, also in bronze.

It is said that another elixir of life has been discovered and our days on this earth may now be prolonged indefinitely. This may suit some people who never figure on paying a bill until death makes them 'cough up' by their affairs being settled through the public administrator. Elixir or no elixir, living or dead, cash is king and is the only 'system.'

The average weight of eggs is

about eight to a pound, so that a dozen eggs would weigh about one and a half pounds. A pound of eggs contains more nourishment than a pound of meat. There is no flesh food that may be served in so many palatable ways as eggs, nor as easily obtained by farmers. Eggs are a perfect food, containing all the consistent elements of nourishment.

Turkey has withdrawn a large sum of money, reported to be \$17,500,000, from Germany, according to a despatch from Bucharest, Roumania. The money was deposited in Germany during the reign of the Sultan Abdul Hamid and was earmarked exclusively for a war fund. Germany has consented, said the correspondents, to its delivery to the Ottoman Government and the gold is now in Constantinople.

Reports from the Department of Agriculture state that the rot in the potato crop is a good deal worse than was anticipated and the farmers are getting ready to rush their potato crop to the market before it is spoiled by the rot. Should this result it would mean that the market will become flooded with potatoes for the present, but after the rush there will be a shortage of winter potatoes and high prices will then prevail.

Canadian Congregationalist:—This should have been a Thanksgiving issue of our paper, but under existing circumstances we do not think it worth while to more than note the fact that October 28th was appointed by the Government to be such a day. The way it has been observed for the past few years is wholly out of keeping with the spirit of the day. Sham-battles, etc., has been the order of the day, and will be again. The day has been changed from Thursday to Monday to oblige railroads and commercial men. To call it a day of Thanksgiving is a misnomer.

Scientists declare that as a motive power for operating automobiles and motor boats liquid air is superior to the electric storage battery, since it requires no tedious waiting for the process of recharging, and it delivers more than double the power of the former, with half the weight. Gasoline is not in the same class with liquid air, for the latter emits no noxious odors, nor is there any danger of explosions. As a refrigerant there is no source of cold like liquid air. Other than operating automobiles and serving as a refrigerant there is hardly a thing that human mind can think of that liquid air cannot do, from providing a magical entertainment to the production of continuous power. Yet there is lacking a process by which it can be produced cheaply enough to compete with other sources of motive forces now in use.

Overwork is contagious. The very air of America breathes and burns overwork. The wife of an overworked man is very apt to be driven from sheer lack of occupation and companionship into undertaking more and greater problems than are comparable with her strength. The high cost of living, the desire to emulate one's neighbors, and the wish for luxuries beyond their grasp are important factors in bringing about overwork in both the sexes. Overwork pleases because it stimulates; it entices because it leads to power; it entrances because it beckons fame. Regard it, however, from the opposite point of view. It enslaves the worker; narrows his field of vision; augments his egotism and it deprives his family and friends of the pleasures of his society, and the benefit of his experience. It is a selfish fashion, and one which inevitably leads to destruction. It makes a man unfit to live with, and it makes him unmindful of his duties as a man and a citizen. Every man should work, but no man should overwork.—Exchange.

The Procurement and Sale of Noxious Drugs.

(Calgary News-Telegram.)

After a rather long-drawn out but carefully conducted prosecution, a Calgary physician has been convicted and fined for giving a prescription for cocaine under circumstances contrary to law.

The press generally is reluctant to give prominence to conviction of professional men for unprofessional

conduct, on the ground that they have no desire to injure their prospects, but there are cases which are so flagrant that they cannot be passed over without comment, in the interest of the community generally, who have, under some conditions, the right to be protected against themselves.

The abuse of alcohol has slain its thousands, but the use of cocaine and morphine is running tens of thousands of persons belonging to a class in the community which can be ill spared from the activities of commercial, professional and business life. The "dope" fiend is a miserable moral wreck, because he has no power of himself to rescue himself from the sad effects of his favorite potion. For the brandy drinker and the whiskey toper there is hope, but for the cocaine or the morphine fiend there is no hope unless his supply can be and is effectively cut off. In this case what cannot be cured by persuasion must be ended by suppression.

If these drugs be administered under strict medical rules, their use can be controlled, and ultimately abandoned, but so long as they can be as easily procured as was demonstrated by the recent prosecution, there will be an increase rather than a diminution in their abuse. The importance of these prosecutions lies more in the fact of conviction than in the severity of the penalty imposed, and there is now a likelihood that the looseness of the past will be counterbalanced by the precautions of the present and the future. This is the object of the act of parliament under which these cases were taken.

Catarrh Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly upon the blood and mucous surfaces. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly upon the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

Tobacco Growing in Ontario.

In the south-western peninsula of the Province of Ontario tobacco growing has become a very profitable branch of farming. In order to place the industry on a substantial footing the Dominion Department of Agriculture some three years ago established an Experimental Station at Harrow in the County of Essex. The station has been equipped with a suitable barn, a drying shed and other necessary facilities. This is but one of several Tobacco Experiment Stations operated by the Tobacco Division which is in charge of Mr. F. Charlan, a tobacco specialist. The Harrow station is in charge of Mr. W. A. Barnet, B.S.A., who has prepared a report of the work carried on under his supervision in 1911.

The station which comprises thirty-eight and a half acres is carried on to some extent as an ordinary farm. Last year fifteen acres were devoted to tobacco experiments in which nine of improved Burley and six of Waverly varieties were dealt with. Tests were made with different kinds of beds, methods of curing, various combinations of fertilizers, seed selection, combating the tobacco worm, etc.

Referring to the returns from bright tobacco as compared with white Burley Mr. Barnet concludes that white Burley is preferable for the average farmer to grow. During the past three years the average price secured for this tobacco has been twenty-five cents per pound or an average gross return of two hundred and fifty dollars per acre.

This report which is designated Tobacco Bulletin A-14 is available to all who apply for it to the Publications Branch, Department of Agriculture, Ottawa, Ont.

Wheat has been found growing in the Andes mountains eleven thousand feet above the level of the sea.

Shiloh 25¢
The family remedy for Coughs and Colds. Shiloh costs so little and does so much!

25 Cents to Stop that Itch

Does it not seem strange that so many people suffer year in and year out with eczema?

A 25 cent bottle of a simple wash stops the itch and will surely convince any patient.

This wash is composed of mild and soothing oil of wintergreen mixed with thymol and glycerine, etc., and known

as D.D.D. Prescription. We do not know how long the D.D.D. Laboratories will continue the 25c. offer, as the remedy is regularly sold only in \$1.00 bottles and has never before been put on the market in Canada on any special offer.

If you want relief to-night try a bottle at 25c. on our personal recommendation.

Canadian Hens May Win Egg Contest.

Considerable interest has been aroused in the International egg-laying contest which has been conducted at Storrs, Connecticut, during the past forty-nine weeks. Canadians are more interested than before, owing to the splendid record of the pen of five White Wyandottes entered by McLeod Brothers of Beulah Farm, Hamilton.

So far, these hens have laid a total of 1,017 eggs, and stand second to a pen of White Leghorns from Pennsylvania, credited with 1,035 eggs. However, during the forty-ninth week of the contest the five Canadian hens laid twenty-six eggs, as against twelve eggs laid by the rival hens. In view of the fact that the American hens have a lead of only eighteen eggs and that the Canadian hens laid fourteen more in one week, one can concede the Hamilton hens a splendid chance for the international trophy.

St. Peter's, Rome, cost over fourteen million pounds to build.

The Boy and the Gun.

The numerous fatalities from hunting accidents causes the Guelph Mercury to remark: "About this season of the year the young man, whose knowledge of a gun has been confined to catalogues and store windows, sallies forth to the country to shoot up every living thing in sight. He looks down the muzzle of the gun to see that all is well; he climbs over rail fences with the trigger hit-the-top rail. The funeral takes place next day, and the friends murmur "How sad."

No spot in the British Isles is more than eighty miles from the sea.

There is no more effective vermifuge on the market than Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.
