large rooms of the school and made a most beautiful sight. Crowds attended from two to five o'clock in the afternoon. The School Board gave the public schools a holiday. The success of the show is due in large measure to the energetic work of the obliging secretary, R. F. Richardsen.

Weston

On account of the slaughter of birds and squirrels in the vicinity of Weston, the society appointed a committee to look into and deal with the matter and to confer with the Toronto Humane Society.

Toronto

A feature of the monthly exhibition of the Toronto Horticultural Society held during August was an exhibit of rare water-lilies made by Mr. Dreer, of Philadelphia, one of the greatest producers of aquatic plants in the world. It consisted of twenty-seven varieties ranging from white and creams through pinks and reds into the deep purples, many of them being three inches in diameter.

Annapolis Valley

Manning K. Ellis

In about another week "the Valley" will have finished gathering one of the best crops in its apple growing history. This is particularly true of King's Co., where nearly, if not quite, as many barrels will be picked as last year. In going about the country one fact is noticeable—the very large crops are on the very well cared for orchards. Trees of low vitality could not stand another crop like last year without a rest. Where cultivation and manure are not lacking annual crops can be expected if weather conditions are right. Well sprayed orchards without exception are yielding more apples than where spraying is neglected or only done in a half-hearted manner. Fungus diseases have more to do than we think with the "set" and "drop."

The pack of the United Fruit Companies is giving much satisfaction in the local markets. It is now possible for a dealer to buy a car of Gravensteins of one pack, true to grade and uniform right through the car. With this method of handling, the Gravensteins may again take a premier place among Nova Scotia apples, a place which it had lost by the miserable manner of marketing. Raised right and packed right, the Gravenstein is our greatest advertisement. If its season could be extended by a system of cold storage, its principal disadvantage would be overcome.

Eastern Annapolis Valley

Emmie Watts Buchanan

The United Fruit Companies of Nova Scotia, Ltd., are so well organized that much of the bookkeeping of the branch companies is going through the head office at Berwick, thus saving managers much work. As a result of this individual growers have very little knowledge of apple prices and less anxiety with regard to storing markets. It also lessens the hard job problem, as the men who were employed to sort the fruit on the farms now find work in the warehouses. It is also estimated that by cooperation two or three thousand dollars will be saved in the shipping of small cheques.

Evaporators are springing up very fast or ten miles; these industries offer forty cents a barrel for apples over two inches and pay their boy and girl workers a dollar a day. An evaporator costing two thousand
