

Canadian Explosives, Ltd

Before the Blast.

The Blast.

After the Blast.

Mr. Farmer:—

Can you answer these questions?

Do you intend to get rid of those unprofitable stumps? How are you going to do it?

Will you use a machine, which is the hardest kind of work, often injuring your horses, and requiring a great deal of work to get rid of the stump afterwards?

Or will you burn out the stumps—which procedure destroys the fertile elements of the soil all around the fire?

Or will you try the modern method which does the work at one-third the cost of pulling and chopping them up—a method that will remove fifty stumps in the time it would take to pull and chop up one or two—a perfectly safe and sure method?

Do you want to know all about this labor and time-saving method?

Then write for our free booklet, which is full of valuable information.

Send to-day before it slips your memory.
