

The Blood Current of the Aged.

General muscular flaccidity, the inevitable consequence of advanced age, is the result of a sluggish blood current. The heart loses its pumping capacity, the arterial walls soften and the blood stream lacks sufficient force to properly circuit the lungs and receive oxygen.

Increase the hemoglobin and the red corpuscles in the blood of the aged subjects and nutrition can be maintained at the proper standard.

PEPTO-MANGAN (GUDE) makes the blood rich in hemoglobin and red corpuscles, intensifies its affinity for oxygen and invigorates arterial circulation.

PEPTO-MANGAN (GUDE) exhibits its blood-enriching, strength-imparting and regenerative properties most conspicuously when administered to persons of advanced age.

PEPTO-MANGAN (GUDE) is a combination of organic iron and manganese, and is free from the objectionable features of inorganic iron preparations.

PEPTO-MANGAN (GUDE) is ready for quick absorption and rapid infusion into the blood and is consequently of marked and certain value in the debility and infirmity of old age.

Prescribe Pepto-Mangan (Gude) in original bottles and avoid substitution. It is never sold in bulk.

Samples and literature sent upon application.

BACTERIOLOGICAL WALL CHART FOR THE PHYSICIAN'S OFFICE.—One of our scientific and artistically produced, bacteriological charts in colors, exhibiting 60 different pathogenic micro-organisms, will be mailed free to any regular medical practitioner, upon request, mentioning this journal. This chart has received the highest praise from leading bacteriologists and pathologists, in this and other countries, not only for its scientific accuracy, but for the artistic and skillful manner in which it has been executed. It exhibits more illustrations of the different micro-organisms than can be found in any one text-book published.
