Foreign Crop Summary.

J. P. Bickell & Co. furnish the following Broomhall weekly crop summary:
United 'Kingdom—Weather during the past week has shown some improvement, it having been clear, which has enabled plowing to be carried on.

Argentine—The outlook for the growing crop continues very favorable. There are some private estimates given out which forecast an exportable surplus of 120,000,000 bushels (our agents' preliminary was for 104,000,000).

Australia—Our agent at Sydney cables that the crop outlook in New South Wales is fair; Victoria, good; South Australia, unsatisfactory. There is a disposition on the part of small growers not to sell for forward shipment.

India—The sowing of the new crop con-

germinating well.

Russia—The weather during the past week has been generally dry and cold, and this is unfavorable for the wheat already seeded. Arrivals at the ports and stocks there are liberal, but are not showing any increase.

Roumania—Both the weather and crop outlook is favorable.

Winnipeg Wheat Market.

Wheat—November 97%c, December 93%c, May 98c.

Oats—November 34%c, December 33%c, May 35%c.

Roumania—Both the weather and corported with Stavorable.

Hungary—The outlook for the new crops is very satisfactory.

Italy and Spain—The crops have started well. Supplies of native grains are scarce. Servia, Turkey and North Africa—Weather is favorable for planting the new crops.

St. Lawrence sugars are quoted as follows: Granulated, \$4.75 per cwt. in barrels. Beaver, \$4.45 per cwt. in barrels. Beaver, \$4.45 per cwt. in bags. These prices are for delivery here. Car lots 5c less. In 100-lb. bags, prices are 5c less.

crop.

France—The weather has improved during the past week, and seeding of the new crop is well advanced. Supplies are sufficient for the present requirements.

Germany—The weather has been ideally favorable for the growing crop, and also for late seeding. The weather, however, has now turned cold. Supplies of native wheat are increasing, and there is a less. In 100-lb. bags, prices are 5c less.

Bartlett, Patten & Co. (Beaty & Glassco) wired at close:

Wheat—Upon the giving out of a private cable from Argentine, in which the opinion was given that the crop would be below an average, a little stamped occurred, and prices shot up over ic per bushel, the December leading in strength. The house receiving the cable later explained that reference was undoubtedly made to the crop in the immediate vicinity of Rorario, from which point the cable was sent. The action of the market, however, fully illustrates how sensitive the feeling is to any item of news of a buillish character. Other Argentine cables roceived to-day make no mention of anything in the way of deterioration, but, on the contrary, refer to the prospects as generally very good. The news from outside markets had no particular significance. We can see no change in the general situation. Wheat has friends, and we will have strong spots caused by their buying and by shorts covering, but we can see no reason for a sustained advance.

Corn—The buying was for the most part local and office professional character, while the selling pressure was moderate and from scattered sources. The weather was favorable. The strength in osts came in symbathy with the advance in other grains. Local elevator interests bought December and shorts covered both December and shorts covered b

The Greatest in the Land

All the notables --- with but few exceptions --- who have visited Toronto within the last seven months have patronized Toronto's Taxicabs.

Thus emphatically emphasizing their cosmopolitan utility. For the cab service that can serve the highest dignitaries of the country. as well as being within the reach of all classes, is one that is bound to be the biggest success.

The experience of seven months has been that the Taxicab service in Toronto is a big success, and that the only thing necessary to increase its earning powers is to increase its equipment.

A Public Utility

As a public utility the Taxicab has no

As a transportation system it is not carrying a heavy overburden of expense for right-of-way, first cost of installation of rails, and the added expense of maintenance.

The investment is not handicapped by any such enormous initial expense. Seven months' experience has shown that under the present conditions a div of 10 per cent. per annum or 2½ per cent. quarterly can be paid.

An investment in Taxicab Stock, there-fore---at \$6.00 per share, par value \$5.00---is well worth considering from its present condition, without any regard to its fu-ture increased earning powers. An Unequalled Investment

An investment in an industrial which can be classed as a public utility is not a speculation.

The Ultimate Proof

Taxicabs in Toronto have proven their utility. Social functions now are incomplete without them. Every night they are in evidence at every theatre in town.

At every hotel in the city the Taxicab is first thought of when cab service is requested.

Business men are using them more and more every day to keep their business engagements. Travellers depend on the Taxicabs for catching their trains.
