THE BAROMETER.

He questioned the necessity of the bill at this moment, and the judgment which had introduced it. However, that was only his opinion. In this connection, he repudiated the statement that he had coined the phrase us pot navy." He, had never used it. He was not an alarmist, but he considered that the leaders, charged with responsibility, should hesitate in this matter. The question was, "Is it a necessity at this moment?" He did not think it was.

"I do say," said Mr. Emmerson emphatically, "that a spasm and a paroxym seized the government, when it seized my hon, friends on the other side of the house, when they cried for

It was that we should contribute from three to five million dollars a year to a fund which might be named "Canada's Peace Fund." The money could be deposited in the Bank of England, and, should a real emergency arise, it could be used for the defence of the empire. Meanwhile it would serve as a notifi-

After the harvest the grain is immediately threshed. The tithes, or government tax, is first taken, which is onelately threshed. The tithes, or government tax, is first taken, which is one-tenth of the whole crop, and then the remainder is divided, the landlord receiving his one-third share. The farmer has generally pledged a good portion of the expected crop, virtually selling it at a greatly reduced price, for his necessities. If grain is \$1 a bushel, on an advance to him of \$100 he will agree to deliver to the party who advances the money 130 or 140 bushels of grain after the harvest. Should the crop fail, it is carried over to the next year, but under a new contract in which 20 per cent, is added to the original amount. The farmer classes have no realizing sense of the injustice done them in matters of business. They are thus kept destitute and poor and can hardly provide themselves with the common necessities of life. SAPPHIRES MAP COST LESS.

While the cost of food and clothing
may continue to rise despite even a
Congressional investigation, there are
pretty fair prospects that the cost of

The land is rented and farmed in a primitive way, which is unprofitable to both landlord and tepant alike, as compared with what might be accomplished under a more advanced system. The lands are rented for one-third of the crop produced.

After the harvest the grain is immediately threshed. The tithes, or government tax, is first taken, which is one-

would still be two millions less than the former figure.

"These are the facts in a nutshell. Not a single word can be controverted or questioned. The people of the province can form their own conclusions."

Hon. A. C. Rutherford became premier when Alberta became a province in September, 1905. The present complexion of the house is: Liberals 26, Conservatives 2, Independents 2, Socialist 1.

CRAB this--sonny-and mull it over in your nut--jest when you're gitting chesty--There ain't never been and won't never be any one mutt what's the hull cheese."--Spiflicated Bilkins.

Lets of men though---who have not yet grasped the idea that---granted they know their own business from foundation to ridge pele--they are not quite up in the mysteries of advertising.

These are the kind who tell you--and believe it when they say so--that advertising doesn't pay.

Advertising is a business it takes years to learn and unless you are willing to spend the time necessary to qualify---don't waste your energies. Use them in your own line. Send for an advertising expert and slide your worries on to him.
