Mr. Justice Middleton Opens Action of Charles

Moodie.

Hamilton, Tuesday, Oct. 3.—The creating of a department of municipal affairs in the government or a board from which a municipality could get expert advice was the keynote of a rumber of speeches delivered by the delegates attending the second town planning convention of Weston, Ontario, which opened at the Royal Connaught yesterday afternoon. Close to 200 delegates are expected to be in attendance at the convention, which will continue until this evening.

Acting Mayor Morris gave notice of a motion requesting the government to take action at most convention.

to take action at once to appoint a commission to draft legislation for the purpose of establishing a municipal department with due regard to pro-serving the authority of the local town planning commission.

Bread, milk, meat—all have climbed to seemingly prohibitive prices and still the demand continues. Coal is the next that threatens, and here conditions are likey to be repeated.

The fact that bread, milk meat and the rest are still in demand to such an extent that the supply can hardly correspond to the call, seems to point out that the country, despite what it costs to live, is by no means in a despondent condition. The thrift which we hear so much about as a necestary of the times has correct inverse. we hear so much about as a necessity of the times has scarcely-impressed itself upon the people. Money, generally speaking, is no scarcer than it was a year ago, indeed, it seems to be more plentiful. Retrenchment, if it exists at all, has not yet affected the exterior life of our citizens. People seemingly eat and dress as well as in seemingly eat and dress as well as in former years. Places of amusement, too, are patronized to the full; poverty seems less prevalent than in former

seasons. All of which bears out the theory that high prices are good for the country, provided always that these prices are due to general legitimate conditions and circumstances, and that they are not the results of a hold-up of capital against labor or collusion amongst any body of men for their own aggrandizement and to the detriment of the remainder of the citizen body.
