INTENSE ARTILLERY DUEL PROCEEDS IN LENS AREA NO PEACE WITH A GERMANY DOMINATED BY AUTOOCRACY--Lloyd George

FOE GETS TO FRENCH LINE AND GETS OUT

Penetrates Trenches Only to Be Driven Back by Counter-Attack.

REPULSED EVERYWHERE

Vigilance of Troops Stops Germans From Making Headway.

Paris, July 21.—In the course of violent fighting last night on the Aisne front, southeast of Cerny, the Germans twice penetrated French trenches and were driven out by counter-attacks, the war office announces. Several other attacks at different parts of the front were repulsed by the French, who inflicted heavy losses on the Germans.

The statement follows: "North of Braye-en-Laonnois, in the sectors of Cerny and Hurlbeise, and at Craonne, violent bombardments were followed by efforts of the enemy to attack. Everywhere the Germans were repulsed by our fire and by the vigilance of our troops were moved in violent combat. Twice the Germans penetrated our advanced trenches on a front of 250 metres. Both times they were vigorously counter-attacked and driven out entirely. Southwest of Cerny a German attack was broken up in spite of the employment of flame-throwers. "South of Ailly our bomb throwers recently checked two successive attacks. Between Hurlbeise and the Calonne Plateau troops were moved in preparation for a strong attack, but our fire, which was opened at once, prevented the enemy infantry from coming out of its positions, and inflicted great losses. "On the remainder of the front the night was comparatively calm except in the sectors of Craonne, where fighting continues, and in Chevaliers wood on the heights of the Meuse, where we repulsed a surprise attack."

Some idea of the great reception the Highlanders received in New York may be had from this picture, which shows them wheeling into one of the main thoroughfares. One Highlander is carrying a British flag, another the American, and another the French. Such a thing probably never occurred in the United States before. "The Ladies From Hell," as they are called, left for Chicago on Saturday.

FOOD REGULATIONS FOR RESTAURANTS

Hon. W. J. Hanna Makes Statement Regarding Necessity for Conservation.

WIDESPREAD DEMAND Public Must Eat Less Bread and More Vegetables in Season.

Hon. W. J. Hanna, on behalf of the food consumption control committee, has handed out a list of regulations dealing with food conservation in order that the consumption within Canada of those articles of food urgently needed in Great Britain may be curtailed as much as possible. The statement is as follows: "Many suggestions have been made and much information has been furnished to the committee, and as a result of the consideration of these suggestions and information, it would appear that there is a widespread demand for regulations to be made covering all public eating places (a term which requires definition), and that these regulations shall include at least the following: 1. That no beef shall be served on Tuesday or on Friday. 2. That no bacon shall be served on Tuesday or on Friday and that no bacon shall be served except at breakfast on other days. 3. That at every meal there shall be supplied some substitute for white bread, for instance—corn bread, oat-cake, and brown or Graham bread; or, if it is found that on certain days of the week no white bread whatever be served. 4. That a printed notice shall be prominently displayed to the effect that the public should avoid all waste and should conserve the greatest possible amount of food, and, to that effect, should eat less bread and other wheat products, and should substitute, in their seasons, green vegetables, fruits and other perishable products for food that may be stored for later use or exported. 5. Requiring that no more than two courses may be served for breakfast and that no more than three courses for dinner with courses to be defined. This latter proposition, while urged from different quarters, is full of difficulties; for instance, it would appear not to be an easy matter to satisfactorily define courses. As regards the general public, printed cards will be distributed setting forth the necessities of the situation, and asking every citizen to sign a form of pledge (furnished with the cards) to reduce considerably his or her consumption of unnecessary food, and, at the very least, to refrain in his or her own home from regulations which may finally be determined for public eating houses. It may also be thought advisable to give to each householder, signing the pledge a card to display in his or her window announcing that he or she has done so; something like the cards used in England and which are being adopted in the United States. The committee propose to hold meetings in several of the larger cities at which representatives of the various classes affected will be asked to express their views. After hearing what is said at such meetings the committee will report their final recommendations."

UNIONIST GOVERNMENT STILL UNDER WAY

Special to The Toronto World. Ottawa, July 21.—The statement given out by Hon. George Graham at Toronto on Friday night that the Ontario Liberal M.P.s and candidates were solidly with Sir Wilfrid Laurier is not accepted by those here who ought to know. As a matter of fact they will sooner or later part with Sir Wilfrid. The western Liberals will part with him at the August convention in Winnipeg; and that as a matter of fact the conscriptionists in the house here have selected a leader who is ready to negotiate with Sir Robert Borden for a unionist government and to accept all the consequences thereby entailed. Further that the negotiations are so far forward that coalition is likely to be a fact by August 10, parliament over in less than a fortnight thereafter, dissolved within a month, and the country in the midst of a short and sharp election, with Sir Wilfrid's energies confined almost entirely to Quebec.

Premier's Biting Reply To German Chancellor

Does Not Want Germany to Harbor Any "Delusion" That Britain Will Be Put Out of Fight Till Liberty is Established.

London, July 21.—"We can't make peace with a Germany dominated by autocracy," declared Premier Lloyd George. "The war now becomes a struggle between two definite groups of national ideals. Significant in this respect is the news announced today of the accession of that brilliant Russian statesman, Kerensky, to the leadership of Russian democracy. "I don't wish Germany to harbor any delusion," Mr. Lloyd George continued, "that Great Britain will be put out of the fight until liberty has been established. I predict it will not be long before the German chancellor delivers a different speech and that is the one for which we are waiting." In conclusion the premier said the entente allies would go on fighting to the end, knowing that the future of mankind was in their trust to maintain and defend.

BROKE UP GUN SHELTERS BLOWING GERMANS OUT

French Tanks, Lighter and Swifter Than British, Get Enthusiastic Reception From Troops Fronting Juvincourt.

London, July 21.—Describing the part played by the French tanks in the Aisne-Champagne offensive, Reuters' correspondent at French headquarters says they received their baptism of fire on the plain below Craonne, in front of Juvincourt. They shared in the successful attack on Lafaux and won the enthusiastic praise of the assaulting infantry for the way they broke up the German machine gun shelters and shot the Germans out of their trenches. The French tank is lighter than the British and somewhat swifter. From its shape it has a better claim to the name "tank" than ours, for it is of huge, square construction, which at a distance you would probably think was some new-fangled kind of tank if the guns peeping wickedly from its sides did not undeceive you.

Duel Increases in Intensity and Keeps Up Continual Roll.

OBSERVER'S EXPERIENCE

Shells Exploded All Around But He Got Down Safely.

By Stewart Lyon. Canadian Army Headquarters, July 21.—The artillery duel in the Lens sector increases in intensity. There is a continual roll of gunfire from our batteries engaged in the destruction of the enemy's defences. His retaliation is unquestionably great. It sometimes assumes a spectacular form. Last night one of our observation balloons, several thousand feet up in the air and at least five miles distant from the German front line, was made the target for a high velocity gun. In the aftermath of the sunset the balloon was a splendid mark. Shells burst all around it for almost an hour, while the observer, suspended in his basket below the sausage, continued his work of recording the hits of our guns behind the German lines and the points from which the enemy's return fire came. Finally, when it was almost too dark for further work, a bit of shrapnel punctured the balloon and it began to deflate. The observer landed safely by the use of the parachute, with which all observation balloons are provided. The enemy's artillery has persistently shelled the approaches to Lens from north and west. These outbursts of exceptional activity are not permitted to divert our batteries from their daily work.
