WHY Live On Butternut Bread

REASON NO. 3:

IT HAS BEEN TESTED HERE. St. John endorses the verdict of U. S. as to its superiority. Butternut sales are now about double all our other kinds combined. Little reduction has been made in the sale of our ordinary bread. This indicates the recognized good quality of our ordinary bread and much more of Butternut Bread.

SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 5 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.
Entry must be made personally, at the local land office of the district in which the land is situated.
The homesteader is required to perform the conditions connected therewith under one of the following plans:
(1) At least six months' residence upon cultivation of the land in each year for three years.
(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.
(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of the homestead, the requirements as to residence may be satisfied by residence upon the said land.
Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.
W. W. CORY,
Deputy of the Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

WIFE WILL HAVE THE MARRIAGE ANNULLED.

NEW YORK, Mar. 20.—James Howard, 73 years of age, who works in a Manhattan silk importing house under the name of James E. Legge, was arrested on Monday night by a policeman attracted by the screams of his wife Edna, a member of Plymouth church, a personal friend of the pastor's wife, Mrs. Newell Dwight Hille, whom he had married under name of Howard, ten months ago. She said she had separated from him, that he had caught her on the street and assaulted her, taking from her a purse containing ten dollars. In Butler street court when Howard was arraigned, it was shown by letters from Halifax and St. John that he was a well-known criminal with a very black record. He had a record as a firebug and all-around crook, having served a term in Dorchester penitentiary for setting fire to a St. John house and then robbing it. Chief of Police Power, Halifax, said he had served two terms in Nova Scotia and had robbed a woman in Point Pleasant Park, Halifax. His wife will have the marriage annulled. Howard was held for the action of the grand jury. He claimed he had tried to reform, but did not deny his record.

A TOAST.

Here's to the man whose hand
Is firm when he clasps your own—
Like a grip of steel
That makes you feel
You're not in the world alone.
Here's to the man whose laugh
Puts the somber clouds to rout—
The man who's fair
And kind and square
To the one that's down and out!

ST. JOHN STAR.

ST. JOHN, N. B., MARCH 21, 1907.

THE TREATMENT OF CONSUMPTION.

The report of the Nova Scotia sanatorium for treatment of tuberculosis which the Star prints today, makes interesting reading. The results achieved in the Kentville institution during its brief existence are highly creditable to the management, and fully bear out the forecast of those who advocated its establishment. The medical superintendent admits that too many advanced cases have been received, that patients suffering from consumption in its incipient stage are the ones who will chiefly benefit by sanatorium treatment, yet he is able to report that the institution has cured or helped many who could scarcely be hoped to recover. The expense has not been great, not as heavy as for ordinary hospital treatment, while the returns from the money spent cannot be overestimated. The restoration to health of a number of victims of consumption is only on feature; of even greater value to the province is the education of the people as a whole by a diffusion of knowledge regarding the proper course to pursue in handling tuberculosis.

A day or two ago the Star referred to the great loss of life in St. John through consumption. The following table shows the number of deaths from all causes, and from the various form of tuberculosis during the past eleven years:—

Tuberculosis	All Causes	Yes
1900	736	189
1901	837	189
1902	679	188
1903	743	188
1904	736	190
1905	721	189
1906	714	190
1907	777	190
1908	751	190
1909	754	190
1910	775	190

It will thus be seen that in this comparatively short period 1,211 persons have died from tuberculosis, of whom at least 900 would now be alive if proper treatment had been provided. During the same years there were in 337 deaths from so-called infectious diseases, the New Brunswick census arranged by the provincial board of health including diphtheria, scarlet fever, typhoid fever, measles and smallpox. One hundred of the deaths were due to an epidemic of diphtheria, and twenty-three to an outbreak of smallpox. Twenty-five deaths from all these diseases is a fairly annual average, while one hundred and ten occur from tuberculosis. This is in St. John alone. The province as a whole can account for ten times as many.

It is generally admitted by physicians that consumption is contagious, and, indeed, all doctors called to attend such cases insist in so far as they are able, on cleanliness, and care in nursing the patient. But in very many cases no physicians are consulted until death is near, and by that time the harm has been done. Families belonging to the poorer classes very quickly give up hope when they realize that one of their number is a victim of consumption. The contagion takes hold of others, and as each in turn succumbs, the belief grows that the disease must go through the whole family.

Hence there appears to be strong reasons why the provincial board of health should place tuberculosis in the contagious classification in order that local boards might have power to deal with it; power to spend money in preventing the spread of the disease and to provide proper treatment. Under existing regulations the St. John board has no more authority to interfere in the case of a consumptive even when a whole family is exposed, than it has in the case of lumbago. Yet the local organization has certain powers, which are not exercised as they should be. The members of the board, busy men, give their services free, and to the best of their knowledge are improving conditions here. The trouble is that the knowledge brought to them is not sufficient. They cannot be expected to go about the city seeking instances in which reform might be made; and there is no officer connected with the board, available for such work. We have a board of health, a competent secretary, and several inspectors, but no health officer. As an instance of what opportunities exist, there is to the knowledge of the Star at least one grocer in the city today, fast approaching the final stage of consumption, who has still strength enough to be in the shop; who personally handles food of all sorts, measures out milk, and is coughing and breathing around the different articles which other persons have to eat. The board of health regulation provides that no one in whose family contagious disease exists, shall sell milk, but consumption, according to the provincial board of health is not contagious.

WARD SYSTEM AND FERRY RATES.

The ferry has never been a paying investment. An annual deficit is reported and the question arises whether this should be met by the people as a whole, or by those who are users of the steamer. Carleton is a part of St. John and the people living in that section deserve most generous treatment in accommodation furnished them. They pay taxes at the same rate as those who live on the east side, and being at a disadvantage in regard to doing business in the city, deserve all that can be arranged for them in the way of low rates on the ferry. Thus the present talk of an increase, in the hope of making the ferry self sustaining will no doubt arouse wide interest on the west side. In view of the approaching election, and while the change in the electoral system is under discussion, it would be well to know the views of different candidates, and the effect a change in the system will have on Carleton. If aldermen were elected from individual wards there would be but two at the board having a close interest in the west end. The others would vote as they happened to feel. Under the present system all the aldermen have as much interest in the west side as in any other part of the city. While this point is not one which should stand in the way of any necessary reform, it might well be considered by the people of Carleton.

PASSOVER IS NEAR.

Jews All Over the World Preparing for Great Festival.

Immense Quantities of Unleavened Bread Used During the Passover Baked in New York.

The feast of the Passover will be celebrated by Jews all over the world this month, and the people who are busy making preparations for its observance are working night and day. There is much ceremony connected with the Seder, or opening festival, which will be celebrated this year on the evening of March 29, and there is ceremony also in connection with cleansing the homes, storing away the ordinary table and kitchen utensils, so that the one dedicated to service for the Passover time may not be contaminated.

There are hundreds of quaint observances in connection with the festival of Israel's first born from the judgment wrought on those of the Egyptians and the wondrous liberation of the Hebrews from Egyptian bondage, but the best known feature of the festival of a week is the unleavened bread—matzo—the baking of which has kept hundreds of people employed for many months in about 40 bakeries in New York City. There is one large establishment among these which occupies a five story building 100 feet long and 92 feet wide, where nothing is done all the year except to manufacture the crackers which are used in lieu of bread in the Passover season. This concern turns out about 2,500,000 pounds of matzo and matzo meal, which is made by pulverizing the matzo, and is used instead of flour all through the Passover time. This concern sells its product not only to consumers and dealers in New York but sends matzo to the parts of the United States, and large quantities to Cuba, Porto Rico and South America.

The prices range from 4 to 5 cents a pound, and deliveries are made to dealers and consumers in all forms, varying from "loose" or unpacked and in such packing cases as to packed packages in fancy boxes. In many of the Jewish homes the unleavened bread is placed on the table only as a symbol, but not for use, and in the homes of all the reformed Jews bread is not entirely dispensed with in Passover time. But among the orthodox Jews the custom to use nothing but unleavened bread is strictly adhered to, and the matzo consumed by the orthodox Jews are nearly all made on New York's East Side, because the larger establishments do not conform strictly enough to the rabbinical laws governing their making.

LIVER DULLNESS

When your liver is sluggish the certain result is that you will be dull, lazy, and dispirited. The vim that makes life worth while is lacking. Restore the activity of the liver and energy will be yours.

McKILL'S BAKERY,
194 Metcalfe Street.
Branch 88 Wall Street.
Also at 505 Main St. Phone 1825.

One baker said:—"We work six months every year to produce what our customers require in one week. We make only the square unleavened bread, which is the only correct kind. The round cakes which the reformed Jews eat cannot properly be made, because the pieces which remain between the disks as they are cut out are kneaded over and over again, and that causes fermentation and makes the product useless from the orthodox point of view. Our product is square, and pieces as they are cut are baked and nothing is worked over."

"No one tells his neighbor how much he bakes—that's his business. But any one can figure out how much must be baked by all of us. There are seven hundred thousand orthodox Jews in New York, and you can figure on ten pounds for each person for the week. That would be seven million pounds required to feed our own people. We require twice that quantity, though, because we ship our stock all over, and sell much to people who are not Jews, but like what they call 'Passion cakes.'"

The baker pointed to a row of boxes and said: "That is all going to poor people who will never know who paid for their matzo this year."
In explanation he told of a "rich lady," by whose order he was sending the Passover bread to persons whom he knew to be "poor," but who wouldn't tell. The baker also volunteered the information that the physicians who practice among the orthodox Jews are always busy at Passover time. Matzo is a steady diet for a week has a bad effect on the digestive organs, which are taxed to the utmost at that time by "goodies" and delicacies, which are never served except at Passover time. Among these the most notable is the matzo schal, the quality of which may be judged by this recipe:

Three soaked matzo, eight eggs, two cups sugar, two grated apples, one and a half cups seeded raisins, one tablespoonful cinnamon, grated rind of an orange and a lemon, a few pounded almonds, and one and a half pounds suet or rendered fat.
Beat the sugar, eggs and cinnamon together until light. Then add the raisins, apples, almonds and rind, and mix well. Drain the matzo, gradually add them to the mixture and beat until very light.
Melt the fat in the dish in which the schal is to be cooked, and then pour in the mixture. Bake in a moderate hot oven from one and a half to two hours and serve hot.

SOLDIERS TOLD TO LOOT SALVADOR

Practical Declaration of War by Nicaragua

Against Neutral Country—Incriminating Paper Found on Soldiers of the Republic.

PUERTO CORTES, Honduras, Mar. 14, via New Orleans, March 19.—A turn of sinister and of great significance was given to the Central American war today by the finding on captured Nicaraguan soldiers of proclamations purporting to have been issued by the first cities which they can capture in Honduras and Salvador.

This proclamation amounts to a practical declaration of war by Nicaragua against Salvador; it shows that the Nicaraguan soldiers are being sent to fight what they believe is a war of vengeance, and it places Americans in Puerto Cortes and throughout this republic on the anxious seat because of the fact that American residents or capitalists are the principal property holders of most of the Honduras cities, especially those which are richest and therefore most liable

WELL! WELL! WELL!

Lots of People Out this Weather Without Rubbers.

It's a great mistake. You catch cold—but even if you don't you spoil your Shoes, and Rubbers cost so little, too, seems as if everybody would wear them.

We Have Them for Big Folks and Little Folks.

Several styles, but the good kind always, and it takes only a few shillings to buy them. We have everything in Rubber Footwear a man, woman or child can desire—and now's the time for Rubbers.

PEOPLE'S DEPARTMENT STORE, 142 Mill St

STUDENTS WEEP AS
"GARRIE" TALKS

At "Number Six Club" She Wins Great Victory Against Drink and Tobacco.

BOSTON, March 20.—A crusade against the noxious cigarette was inaugurated at Tech by Carrie Nation, and so anxious are the students that it threatens to spread, and all the students will soon be among the anti.

It was all the result of a college prank perpetrated by a few of the students who after the performance at the West End theatre, where Mrs. Nation is appearing, invited her to the "Number Six Club" in Lombard Square. The tip was sent broadcast that the noted hatchet reformer was on her way, and when she arrived most 100 students had assembled to laugh and have a good time with what they termed the eccentricities of their guest.

She had spoken but a few words, however, before the spirit of fun departed. With great dignity the aged woman arose, apparently not noticing at all the cynical smile that overspread nearly every countenance.

As she proceeded the tears welled to her eyes and flowed down her cheeks, while in a choked so earnest that it almost choked her utterance she told of the injuries she had seen wrought in young men by smoking. Immediately after she turned her attention to wine and liquor, recounting in tones charged with horror that they reached the heart-strings of her hearers, the devastation perpetrated by drink that had come under her own observation.

Before she left she made another plea, and asked the students if they would refrain from smoking cigarettes in the future. Every person promised that he would, and Monday night the campaign had begun, for those who signed the pledge had really started out to convert their students who had not been present.

M. M. Webster, manager of the St. Croix Courier, St. Stephen, will leave at an early date for Glace Bay to assume the management of the Glace Bay Gazette, a daily publication. Mr. Webster's numerous friends on the border wish him success in his new undertaking.—Bangor Commercial.

Knicker—This was called a rich man's panic because there were no failures.
Bocker—Then is marriage a poor man's panic?
