A 20th Century Suit for Summer

A summer suit of the common kind gets saggy and mis-shapen quicker than a heavy suit. The fabric is thinner. There is less lining—less opportunity for shape-retaining work.

But this does not excuse the 20th Century people from upholding THEIR standard of permanent elegance. So THESE summer suits are constructed with extraordinary care—with all the rare skill and attention to detail which have so long characterized this brand of clothing and made it distinctly the best.

We offer modish browns, grays and blues in popular striped effects—superb in style and sure to retain their original elegance throughout the season.

Your Exact Size. \$8 to \$18.

Our line of fancy vests is replete with distinctive patterns, several new designs having just been added.

Really remarkable values at \$1.00 to \$2.50.

Top Coats, Rain-or-shine Coats, Summer Overcoats—smart styles for men who demand the best.

Our clothing on hangers, is dust-proof cabinets. Easy to see. Free from wrinkles. Ready for service.

GETTING AT THE BOTTOM OF THE LAPORTE MURDER

LAPORTE, Ind., May 14.—The possible determination that the globules of metal found by the mining operations in the Guinness farm yesterday were bits of gold used in filling or crowns for teeth is likely to be a development of importance in the case today. The specimens were turned over to the local jeweler last night and it is expected that he will report on them soon. The mystery has reached a stage where the determination of such facts are of major importance. The discovery of additional bodies is a remote possibility and the identification of any of the seven endeavors remaining unmarked is even more distant to be expected. Yesterday's developments did little to elucidate any of the unsolved problems.

The above was the verdict given last night in the inquest into the death of Alphonse Savigneau and three other victims of the explosion on the R. and O. steamer Brockville, Saturday last.
