

New Insurance Effectuated in Canada for each Year from 1876 to 1900.

The yearly progress of life insurance is well illustrated in the following table, as is, also, the marked tendency of Canadians to effect their insurances in their own Companies. While in 1876 the United States Companies obtained over \$1,000,000 more insurance here than did native Companies, this condition soon changed, until in some years the United States Companies failed to secure as much as one-half the amount of insurance obtained by the Canadian Companies. The insuring public has apparently realized, what is an absolute fact, that native Companies can do as well for their policy-holders as foreign Companies.
