### Close Coupled Seat

One-third More Loading Space

Look at this picture of the SAMSON Truck. Note how the seat is placed forward alongside of the hood—instead of back of the hood. This gives one-third more loading space for SAMSON Truck users than is possible in other trucks of same rated size and capacity

### Extension Bases

Demountable Cleat Bands Cannot Sink in Soft Ground

This is one of the newest truck inventions and exclusively on the SAMSON. The wheels carry extension bases, and the rear wheels are equipped with demountable cleat bands and grousers. This provides sure traction in any weather on any road, or in any field. Mud, snow, slush or soft ground hold no terrors for SAMSON Truck users

## Built for Farm Work

The Samson Truck is not just an ordinary truck for average hauling on good roads. It is a practical, proven mechanical unit and is built especially for farm hauling in the hard-going fields, as well as on the worst roads. You can use it in soft, slushy fields. You can use it on heavy, muddy roads. The Samson makes its own road. This is important to farmers in this community because it means in bad weather, when the roads are muddy and the fields are soft, the owners of Samson Trucks will not have their trucks idle at busy times. They can go right along with all their hauling. The special and exclusive Samson Truck features, explained opposite, make this possible.
