Ensilage Seed Corn

"The Yield is What Counts."

MAMMOTH SOUTHERN, GIANT PROLIFIC, YELLOW DENT, LEAMING YELLOW (early maturing), WHITE CAP YELLOW DENT (early maturing), RED-COB WHITE. Read the following from one who has tried our Mammoth Southern and knows what it is. Don't let your dealer catch you with some Cheap John variety by that name. Get the PURE article—take no other. Write us if your dealer does not keep ours, and we will tell you where to get it pure.

TILSONBURG, ONT., JAN. 24, 1901.

MESSRS. E. R. ULRICH & SONS, SPRINGFIELD, ILLINOIS:

Gentlemen,—I notice your advertisement in FARMER'S ADVOCATE, of Seed Corn. I used to buy seed corn from you several years ago, and it was always good and gave me great crops—20 to 24 tons to the acre, but late years I have bought my seed corn from which I have had poor crops, yielding 4 to 6 tons less per acre than what I got from your seed. Two years ago one-half of my seed failed to grow at all—had to re-plant with other seed. Are you still selling that good, sound Mammoth Southern Sweet Corn that I used to buy from you? If so, what would it cost me per bushel delivered in bond? And have you some good earlier varieties that you can recommend as large yielders of ensilage? We like some earlier that will mature for ensilage. Earlier varieties make richer and sweeter silage, but not so much of it to the acre. I grow 60 acres for silage. Yours truly,
E. D. TILSON.

Best Grocers Sell It.

Cheese and Butter.

Makers of these articles, in many instances, do not pay the necessary attention to the quality of the Salt they use. Some people think that "Salt is Salt," and it does not matter where it comes from or who makes it. This is a great mistake, for it is essential that to produce the best Butter or Cheese nothing but the purest Salt should be used. The number of prizes obtained by users of—

COLEMAN'S OR RICE'S Dairy Salt

at the various exhibitions is conclusive proof that these brands of Salt stand unrivalled.
