# VERVOUS DISEASES IN THE SPRING

### can be kemoved by Toning Up the Blood, Thus Strengthening the Nerves

Nervous diseases are more common and more serious in the spring than at any other time of the year. This is the opinion of the best medical authorities after long observa-tion. Vital changes in the system after long winter months may cause much more than "spring weak-ness," and the familiar weariness and achings. Official records prove that in April and May neuralgia, St. Vitus dance, epilepsy and various forms of nerve disturbances are at their worst, especially among those who have not reached middle

The antiquated custom of taking purgatives in the spring is useless, for the system really needs strengthening, while purgatives make you weaker. Dr. Williams' Pink Pills have a special action on many forms of norvous disorders, but also other spring troubles, such as headaches, weakness in the limbs, loss of appetite, trembling of the hands, as well as unsightly pimples and skin troubles. They do "But then when the time comes" to appear to anderstand my case. Sons come along, I say to myself:

Now this spring I am surely going made a new person of me."

chers of deportment in lu ous West End London salons a busy putting pretty debutantes "through their paces" for the coming courts. Rehearsals are not as exacting as in Queen Victoria's time, for the Georgian debutante will not have to face quite so for-midable an ordeal. She will curtsy once to the King and once to the Queen, then retire as gracefully as possible to the supper room. However, even this comparatively simple performance must be carried out to perfection.

The minimum cost of a debut-ante's outfit is \$150, but as a rule more than \$1,000 is expended, the heaviest items in the account being \$500 for the gown and \$150 for the cloak. An American bride has been known to spend as much as \$8,500 on her court outfit, the

gown costing \$7,000.

The courts will be held, as usual, in the handsomest room in Buckingham Palace, the great ball room which has recently been magnifi-cently decorated and is now every bit as imposing as the celebrated Hall of Mirrors at Versailles. There are four enormous new entrances, each more than twenty-seven feet high, and with four swinging doors composed of mirrors, which reflect the glittering scene. So wide are these doors that twelve prsons can enter abreast.
