Bolting Our Food.

Dr. Henry C. Ferris, recording secretary of the New York State Dental Society, recently presented an illuminating report showing the effects of the bolting of food. Dr. Ferris addressed a letter to one hundred and fifty of the prominent medical men of this country in which he asked them if they considered imperfect chewing and salivating of food an aetiological factor in diseases of the stomach and intestines, and, if so, what pathological conditions resulted from such neglect? Out of the hundred and fifty replies that Dr. Ferris received 98 per cent of these physicians said that chewing of food was an important factor toward good health and that the bolting of food frequently caused cancer, catarrh of the stomach and gastric ulcers. If food is not thoroughly chewed and is permitted to reach the stomach in large lumps or masses, there is no question that it must injure the soft lining of that organ, producing many of the cases of ulcers and catarrh that need careful and consistent medical attention. Some further comments on this question are to be found in the course of a review in October Bixy Man's.

Biliousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine intended especially to act on that organ; to cleanse it, strengthen it, tone and invigorate it, to regulate the liver, and to banish biliousness positively and effectually. For sale by all dealers.
