NO matter how soiled or lifeless a piece of furniture may be, it will take on a new-like appearance when O-Cedar is used.

Simply wet a cloth with water and put a few drops of O-Cedar on it. Rub this over the surface—it will remove the dust and grime—it cleans as it polishes. A light rubbing with a dry cloth gives a dry, hard, lasting lustre.

NEW YORK, Aug. 16. Resolutions urging that "the United States recognize without delay the Republic of Ireland" were made yesterday by Supreme Officers of the Knights of Columbus to the Secretary of State, the President of the United States Senate and the Speaker of the House of Representatives.

#### Local Yacht Club Willing to Celebrate.

BUT WANTS ASSURANCE OF FINANCIAL SUPPORT.

That the Royal Cape Breton Yacht Club will issue a formal challenge for the America's Cup as soon as the assurance is received from A. C. Ross, of Montreal, that the financial arrangements are completed, was the decision arrived at by the executive of the club at a meeting held on Tuesday afternoon.

Immediately after reaching this decision, F. E. Lucas, commodore of the club, sent a telegram to Mr. Ross telling him of the club's action in the matter. The telegram is as follows:

The executive agrees that a formal challenge will be issued only when the club is assured that satisfactory financial arrangements are completed and are further assured of the cooperation of the yacht clubs throughout Canada.

Commodore Lucas in a statement made to the Record on Tuesday afternoon, said that the members realized that the club, was not in a position to finance the scheme alone, but that they were more than willing to take the matter up for the other yacht clubs of Canada, providing that complete assurances was given that they would get the necessary financial support. "We do not want to commit the club as the matter now stands," said Mr. Lucas.

As the Royal Canadian Yacht Club, the Halifax Club and the Bras d'Or Club are the only clubs in Canada eligible to challenge for the historic yachting trophy of the world, and for which Sir Thomas Lipton has for many years been trying to wrest from the Americans, it will be in the name of either one of these clubs through whom the challenge would go backed by the other clubs of the Dominion. The challenge of Mr. Ross, which has been made to the New York Yacht Club, has already created a great deal of comment both in Canada and the United States, and if the local club should be the club chosen by Mr. Ross to make the challenge, it would mean a big thing for Sydney and Cape Breton.

According to telegrams received by Commodore Lucas from Mr. Ross on Tuesday, the present indications are that the \$1,000,000 required for the undertaking will easily be raised, and he advises the club not to worry about the finances, as all the newspapers of Canada will give their support editorially and otherwise by boosting the project. Mr. Ross also advises that all of the trust companies of Canada will take the money subscribed and disburse it without cost. The local club will await a reply from Mr. Ross, and if the money is forthcoming, a challenge will be issued.—Sydney Record.

#### Mainly About People.

mainly about people. A surgeon of Paris has made a woman of 49 look like a woman of 25 by making small incisions behind the ears and on the scalp and stretching the skin as one would stretch a carpet, and her new youthful beauty is expected to last for eight or ten years, if she doesn't smile, or frown, or cry too much.

Ernest Tompkin Seton, author of "Wild Animals I Have Known," and a host of other books, celebrates his 60th birthday this month. Though now a resident of Connecticut, he was born in England, and lived for some time in the backwoods of Canada. He delivered his 2000th public lecture some time ago.

The most recently published, authoritative list of John D. Rockefeller's gifts to science, charity and other causes contains these items: "A total of \$43,000,000 to the General Educational Board; over \$23,000,000 to the University of Chicago; \$15,000,000 to Rockefeller Institute for Medical Research; \$125,000,000 to the Rockefeller Foundation (which has donated more than \$1,000,000 for war relief work). And there have been scores of contributions of lesser amounts to other institutions and other causes, including the Red Cross, the refuge for birds, investigating hookworm disease, etc.

## Watch Teeth Whiten When You Remove the Film

All Statements Approved by High Dental Authorities

### Free

A Ten-Day Tube of Pepsodent to show you its effects. Send the coupon for it.

### Look in 10 Days

See how clean the teeth look—how they glisten. Then you will know what film removal means.

This is to urge a ten-day test of a tooth paste which combats the film. High authorities have proved it. Five years of tests have placed it beyond question. Leading dentists everywhere are urging its adoption. Compare the results with your old methods, and let your own teeth decide.

#### Film Destroys Teeth

That slimy film which you feel on your teeth causes most tooth troubles. Every modern dentist knows that. Dental science, for many years, has sought a way to end it. That film is what discolors, not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. So the major object in cleaning teeth is to keep them free from film.

Old-time methods fail to do that. Teeth still discolor, still decay, as millions of people know. The reason is that brushing does not end the film. The film is clinging. It gets between the teeth, enters crevices and stays. Day and night, month after month, it is a potential source of danger.

#### Now a Way to End It

Science now has found a way to end it. Five years of tests have proved this. The way is now embodied in a dentifrice called Pepsodent. And we urge you to see what it does.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

But pepsin must be activated, and the usual method is an acid harmful to the teeth. So pepsin long seemed barred. But science has now found a harmless activating method. It is made use of in Pepsodent.

Now millions of teeth are daily cleaned as they never were before. Try the method ten days on yours.

Send this coupon for a 10-Day Tube. Use like any tooth paste. Note how clean your teeth feel after using. Mark the absence of the slimy film. See how the teeth whiten as the fixed film disappears.

Watch the results for a few days. Read in our book how they come about. Then decide for yourself what tooth paste you and yours should use. Cut out the coupon now.
