His Well is Doing Quite Well at Present-Letter from a Texas Cowboy.

The Sad Story of a Pair of Tan Colored Shoes-A Colored Dream.

[Copyright, 1892, by Edgar W. Nye.] BUCK SHOALS, N. C., August.

Water was struck in my well in paying quantities a short time since, and to-morrow I will go down into it to wash off the powder stains and kalsomine same. I shall put in pumping works in September and lay a wire screen to keep the largest of the children from falling into it and giving a chalybeate taste to the water.

Berries have been very plenty this season, straw, black and whortle, at five cents per honest quart. They are very well t think.

Your struly,

Job.

Thanking you for your cordiality, Joe, and offinand way to suit the season. It is very warm at present. If you come now, your "leaf of absence" would answer very well t think.

Your Texas clothes would not get you into trouble here if you were under a good character. You could ride in one of our tournaments also.

We had a passage at arms last month here at Asheville. Each Sir Knight wears what suits him best. We had one Sir Knight who wore a suit of quoted by travel through the briers and woods. We had been barbed and battered and traveled in the cars. Now in almost and traveled in the cars. Now in almost and traveled in the cars. Now in almost a lot of postal cards, saying that the Flower Girl is wearing my tan shoe's and bicycle hose, but that the writer will not say anything regarding it if I will send on cigars, etc.

well provided with berries and small fruits. Everything in the way of fruit and colored people grows almost spontaneously here. One pickaninny seems to call for ano her, as I heard a man say in Buncombe county not-long since.

And what are we to do with the race problem at the south? Everywhere I hear that question, especially where there are no colored people. Hence there seems to be no more probability of a race difficulty than there was when the first shipment of colored people was received from the coast of Guinea. There are no strikes where colored labor is employed. Wages are very moderate, and while a state militia has to be called out now and then in cities where there is no race question, the south, with all her former woes, has had very little trouble of that na ure.

The colored man will yet prove no doubt a blessing when new industries open up in the south, and with his wonderful powers of imitation and quickness to learn all sorts of manual work he is most assuredly a safer man to employ, if he could have the training, than a

if he could have the training, than a fire eating disturbing, dynamiting outcast from Europe:

1 hope I am saying nothing that may

weaken my s ci l position which is now the wonder and delight of all who have examined it, but if some philanthropist like Mr. Carnegie or Mr. Gould would start a colored kindergarden for the training of young colored men in the trades, so that a peaceful but dependent race might have a job, it would make the disturbing element pay attention and be a great and good work applauded by God and umanity.

There is little news here in our coun

try, except that it has not rained since I egan this letter, and a neighbor from Transylvania county, who agreed to sup-ply us with butter from last February until our ard cow should again give milk.

Times here are quiet, but the weather has been cool and delightful in the west-ern North Carolina mountains, and health—course, ruddy health may be seen on every hand.

I turned away and buried my face in my hands.

Now, thought I, is a fine opportunity to do good. So I gave her my tan shoes and a pair of long bicycle hose, and then read a book while she put them on.

Soon after that she got more forehanded and traveled in the cars. Now in almost
