London, Sept. 2.—The rumor is again revived that Lord Hartington is to join the Ministry as Leader of the House of Commons before the new session begins. There is reason to believe that a fresh offer has been made to him and that he takes time to consider it. The difficulty is mainly about Mr. Chamberlain, and he also is being asked to accept a coalition. But nothing is settled and one is inclined to think that. aching will take place until after the autumn session. If Lord Hartington joins the Ministry, Lord Randolph Churchill's return to power will be postponed indefinitely. Domestic politics are very dull, being kept alive only by Mr. Gladatone's speeches and articles.

cerning the rejection of the Chinese Treaty, abled last night from London. In the absence of an official report on the suject from the American Minister in China the Secretary of State dechines to be interviewed in regard to the steps to a model lodging-house, with thirty-nine stabs over her body. The third was discovered Frdiay morning within 300 yards of the same spot. The woman was horribly mutilated, her head was nearly severed, and she was gashed from groin to breastbone. All these outrages were within a radius of a third of a mile, in the very low neighborhood of Spitalfields. The people in the district fear to go out after dark. The police are at present utterly in the dark. They have no sort of clue and begin to believe that the story of Dr. Jekyll and Mr. Hyde is true and that Mr. Hyde is at large. The change in the management of the detective department reveals some discontent with the London police. CAN'T SLEEP!

Sleeplessness and fearful dreams are the earliest and surest signs of brain exhaustion. In healthy sleep brain force is being stored up to meet the next day's demands. But nowadays the ner-yous system has been so overtasked that it is unable to control the mind, and at night the worries, troubles, and work are as present as during the day. Hence the brain has not time to recu-perate its energies. The proper medical remedies are sedatives, nerve tonics, laxatives, and regulators of the general func-tions.
