

# Moody's Labor Saving Farm Machinery

## Moody's Patent Threshing Machine

Like the "one horse shay" our Threshing Machine is built so that every part is alike of first quality. Examine the belts in our machine, their quality will speak for itself, and the machine is of the same quality as the belts. We supply wider powers than ordinary where purchaser's horses are over 1200 lbs each and do not make any extra charge.

## Pitts' Threshing Machine

We manufacture our undershot thresher in four styles, 1st as shown in the cut; 2nd as in cut but with the addition of tailing elevator to carry tailings back to the feeding table. 3rd as in cut except that the grain falls into three boxes instead of measures and in this style we are able to separate the grains as is specially asked for in some parts of the Province. 4th We also manufacture the old style undershot thresher with only one long sieve in cleaner shoe.

With all these threshers we supply our celebrated tread power with double gears, and of widths to suit customers' horses.

## Full Circle Steel Hay Press

This is how our press looks when telescoped ready for the road. A comfortable load for 2 horses can be set ready for work in a few minutes.

We are sole agents in the Province of Quebec for Wilkinson Ploughs. - The best plow manufactured. In buying this quality of plow you are always sure of getting the best quality of mouldboard. There are 21 different styles, to suit every need. We also keep a full stock of Wilkinson Plows repairs. See our local agents.
