Brighton, Mass., Oct. 30<sup>th</sup> « The healing of a very sore finger which it was thought necessary to have it operated if swelling did not go down in a certain time. That swelling had kept growing more and more until I begged the aid of St. Anne and promised to have a mass said in her honor and the cure published in the *Annals*. Also, my mother was taken very ill. Again I begged St. Anne to help us, and the crisis was passed that same night and she recovered. I should also mention the recovery of a little child who had been badly hurt. »

Some time after, she grew worse until finally the physician told me there was no hope for her, that he could do nothing more.
