Galvanized ..
Steel ...
Buckets....

Improved Pattern

Something entirely new, and superior to the old style buckets, made in three sizes.

They are superior to the ordinary flaring English bucket, being of greater capacity.

They are stronger in shape, consequently more durable.

They will not slop over, nor tip over, owing to the wide bottom.

They nest very close and firm, which protects them in shipping.

The rim is in one piece with the body, consequently cannot get knocked off.

They are galvanized, and not lead coated.

Has a Cast Iron shell, which will never wear out, with seamless drawn brass tubes expanded into tube-plates at top and bottom, with double blow-off.

The tubes being surmounted by a cap forming a chamber at the top, and being fastened rigidly only to the lower tube plate, free play is given for expansion, thereby preventing rupture and leakage of joints.
