**TORONTO STEAM LAUNDRY,**  
53 WELLINGTON STREET WEST.  
G. P. SHARP.

**TO ADVERTISERS!**

GEO. P. ROWELL & CO'S  
SELECT LIST OF LOCAL NEWSPAPERS.

An advertiser who spends upwards of \$5,000 a year, and who invested less than \$2500 in this list, writes "Your Select List paid me better last year THAN ALL THE OTHER ADVERTISING I DID."

It is not a Co-operative List.  
It is not a Cheap List.  
It is an Honest List.

The catalogue states exactly what the papers are. When the name of a paper is printed in FULL FACE TYPE it is in every instance the BEST. When printed in CAPITALS it is the ONLY paper in the place. The list gives the population of every town and the circulation of every paper.

The rates charged for advertising are barely one-fifth the publishers' schedule. The price for single States ranges from \$2 to \$50. The price for one inch for one month in the entire list is \$675. The regular rates of the papers for the same space and time are \$2,980 to \$14. The list includes 922 newspapers, of which 187 are issued daily and 735 weekly. They are located in 732 different cities and towns, of which 26 are State Capitals, 161 places of over 5,000 population, and 468 County Seats. For copy of List, and other information, address,

GEO. P. ROWELL,  
10 Spruce St., New York.

**BROWN HOT AIR HEATER**

EQUALS Coal at 25 per Ton in this City.

**SAVE YOUR COAL  
J. W. ELLIOT'S  
PATENT SAVER.**

The First Object—is to produce the greatest amount of heat from a given amount of fuel, and is gained by an arrangement of the three way draft passage and some twelve feet of fine pipe, which is bent down and around the base, and the heat is absorbed by the atmosphere through direct radiation from every part of the stove. Another object of the invention is to secure for heating purposes the greatest possible benefit of the fire contained in the stove, and is accomplished by placing around the body of the stove a series of internally projecting pockets overlapping the fire pot, and so formed that the air of the room is admitted into the lower end of the pockets, and, after passing through them, re-enters the room, having become intensely heated through contact with the inner sides of the said pockets, which are immediately over the hottest part of the fire, thereby producing far greater results from a given amount of fuel than any other stove. Second Object—An evaporator which is a part of the stove. The cover becomes a water tank, and is an effective evaporator; the pivot on which it turns is an iron tube screwed into the base of the tank, while the lower end is closed and rests in a pocket inside the dome, thereby producing a greater or less amount of vapor in proportion to the intensity of the heat. Third Object—There is a double heater, by means of which heat can be conveyed to an apartment above, and supplied with sufficient vapor from the tank. Fourth Object—A combined hot air and steam bath can be obtained by closing the damper in the water tank, and causing all the vapor to mingle with the ascending heat. Fifth Object—

**The Stove becomes Simplified and easy to Control**

All hinged doors and objectionable fittings are abandoned, and are replaced by mica lights with metal tips attached, by means of which the mica may be sprung into place, or removed and cleaned with a dry cloth, or replaced when the stove is red hot, without burning one's fingers. At the base of the mica lights eyelets are placed, through which a constant flow of air causes all the gas or smoke to be consumed or to pass off. Sixth Object—A base plate of cast iron in the place of zinc or other perishable material. The base plate is raised sufficient for the cold air on the floor to pass up through its raised and hollow cone-shape to the stove, and is rained, and by this means a constant circulation is continued until an even summer heat is obtained. The circulation above described causes the floor to remain underneath the stove. The stoves are altogether cast iron; and the low consumption of fuel, the direct radiation from all its heated surface, ensures them to last any number of years and to produce no clinkers or waste.

There are two grates, similar in form to the base of a circular basket; the centre grate is rotated to the right or left by the lever a short distance, and by moving the lever still further to the right or left both grates are worked.

To light a fire close all the drafts in the base of the stove, pass a direct draft in the smoke flue; fill up to the base a feeder with fine coal, leaving sufficient space for air, on the coal place the lightwood, leave the tank off slightly for draft, until the fire has taken, close the door and open the draft in front.

J. W. ELLIOT,  
43 and 45 KING STREET WEST.

1881.

Harper's Weekly.

ILLUSTRATED

This periodical, by its able and scholarly discussions of the questions of the day, as well as by its illustrations, which are prepared by the best artists—has always exerted a most powerful and beneficial influence upon the public mind.

The weight of its influence will always be found of the side of morality, enlightenment, and refinement. The volumes of the *Weekly* begin with the first Number for January of each year. When no time is mentioned, it will be understood that the subscriber wishes to commence with the Number next after the receipt of order.

**Gas Consumers Read This.**

THREE months ago the "Globe" Newspaper Co. purchased one of "Fisk & Woodruff's" Patent GAS SAVING GOVERNORS.

It has reduced their Gas Bills 50,000 feet. The *Globe* has paid for itself in three months, and they are \$50 ahead. Gas consumers, it will reduce your bills in the same proportion. The present quarter will be one of the heaviest in the year. Leave your orders with

W. H. THOROLD, 281 YONGE ST.,

Proprietor and sole Manufacturer for Ontario, Manitoba, and British Columbia. One good agent with some money wanted in each town and city where gas is manufactured. Toronto, Jan. 11 1881.

**THOS. THOMPSON & SON'S  
Great Enterprise.**

We have completed building our

New Wholesale Warehouse ON FRANCIS STREET IMMEDIATELY ADJOINING

"THE MAMMOTH HOUSE,"

And purpose supplying Store-keepers, Associations, and Individuals, whether dealers in Merchandise or not, with Goods by the piece at

**Wholesale Cost Price!**

This may seem at first sight unfair to sell to the *Wearer and Consumer* as cheap as to the Merchant, but we can not forget the hole out of which we were dug; neither can we be ungrateful to the Public, especially to the farmers of Ontario, who did the digging, during the last 30 years we have sold.

**Millions of Dollars' worth of Goods.**

We have seen the rise and fall of thousands in Mercantile life, and have succeeded all these years in "Wearing the White Flower of a Business Life," Buying and selling so that all we came in contact with were money in pocket by the transaction. We make no boastful assertions about our superior advantages, simply stating we use our brains, our capital, and our energy in our business—purchasing our Goods in the cheapest Markets in the world—finding out the inside prices of European Manufacturers—dealing with the Makers of Goods, paying them promptly for them, shipping them to this Country at the least possible expense, and selling them to the

**Wearer and Consumer,** at the lowest minimum of profit.

**Our Departments are:**

Staple and Domestic Dry Goods, Dress Goods, Silks, Velvets & Laces, Fancy Goods, Hosiery and Gloves, Millinery and Mantle Show Rooms, Gents' Clothing, Ready-made and Ordered,

Wholesale Goods Department—Goods by the Piece.
