

wa. Several rafts of logs of last year's cut have reached the Ottawa and the supply of logs in sight is a large one.

This week the first raft of square timber of the season passed down the Ottawa river. The raft, which contained about 150,000 square feet, belonged to Mr. Robert Hurdman. The trip from Pembroke to Ottawa was made in two weeks. At Ottawa, however, a delay of five days was experienced. The repairs at the Government slides at the Chaudiere delayed the movement a couple of days.

Mr. George Fowler, lumber agent of the C. P. R., reports a brisk movement from all the mills between Biscotasing and Montreal. Shipments to the United King-

dom-via-Montreal and to the States are better than they were during the same period last year. Pennsylvania and Ohio points are receiving Canadian lath in considerable quantities. Mr. Fowler has been appointed railway lumber agent for the Ottawa Northern and Western Railway and the Pontiac and Pacific Junction Railway recently acquired by the C.P.R. He will be in a position to give shippers and manufacturers better facilities in the way of car accommodation and time service than were possible under the old order of things. Mr. Fowler is conversant with every detail of the lumber business, and will be able to satisfy to the limit the requirements of each particular case.

Hurdman & Elmitt, lumber dealers, of Ottawa, have been appointed agents for Gilmour & Company, of Trinton. Their

territory will include Ottawa, Hull and districts. They will handle all the products of the Trinton mills and factories operated by the Gilmour Company. The Ottawa end of the business could not have been placed in better hands, as all members of the firm of Hurdman & Elmitt have gained the experience and enjoy in the fullest degree the confidence of the buying public.

Inquiries have been received in Ottawa for pulp wood. The Raymondville Paper Company, of Weyertown, N.Y., invites quotations on the following stock: Spruce pulp wood 24 inches long either barked with machine or hand shaved. Prospective sellers should communicate direct with the company.

New Mill Erected 1901. Capacity 100 Million a Year.

## Spicer Shingle Mill Co., Limited

The purpose of this advertisement to try and convince the Lumber Trade of Canada that we are the only company in British Columbia manufacturing and shipping shingles in large quantities, or that we "know it all." We recognize that "there are others" and that we are not the only "pebble on the beach." To try and make you believe that we are the only people who can supply you promptly and in large quantities with a high-grade shingle would not only be a fish and a bear story combined, but it would be gall of the bitterest kind.

Our competitors in the shingle business in B. C. are nice people, and we presume that they know their business; but we are nice people too, and as we have been in the trade as long as any of them, and a great deal longer than the most of them, we know that we know our business, and that our competitors are not in the possession of any points of value regarding the manufacture of shingles which has not come to our knowledge.

Our old mill was burned down in May last, and in its place we have built what is at the present time the Largest Shingle Mill in B. C.

Our new Mill has 7 of the latest improved type of Dunbar machine, which we run night and day—giving us a capacity of about 100 Million a year.

Competent judges who have seen our new mill, tell us that it is one of the most substantial, carefully constructed, and best planned mills in this province. We ourselves think it is the very best shingle mill in B. C.; and we know that it is equipped with all the very latest improved Shingle Machinery.

Will the trade please note that our contract with the Pacific Coast Lumber Co. closed on December 31, 1901. Orders sent to us by letter or telegraph shall have our best attention.

We want our share of your shingle business, and can guarantee you satisfaction in every particular.

*Spicer Shingle Mill Co., Limited,*  
 VANCOUVER, B. C.

## Another Little Mill

There will be over a million feet of sawn lumber used in this one plant for construction only; over 30,000 lin. feet of piling, besides rock foundations two car-loads of shingle machines only; over 7 miles steam pipe 1-2 inch and up in diameter. A summary of all the material that will be used in the construction of this plant shows that there will be over 520 car-loads, or 21 trains of 15 car-loads each.

With all our past experience in the shingle business, of which we make a specialty, and with all the latest and best improvements in machinery and mill construction, we expect it to be the most complete and up-to-date mill in North America, where shingles can be made better than in the ordinary mill.

The above plant will be in operation about the first of June, and although this mill will have a daily (24 hours) capacity of 1,250,000 shingles, the dealers and consumers need not be afraid of any particular surplus, but can rest assured that there will be one firm on the coast manufacturing red cedar shingles from whom they can get their wants supplied in a hurry with that old reliable "Hastings Brand" so much talked about.

**CUSTOMERS' ATTENTION.**—Please take notice that on the 1st day of January, 1902, all arrangements with the Pacific Coast Lumber Co. of New Westminster, B. C., for the handling of any of our shingles ended. Until further notice our authorized general agents will be Mr. Jas. Twitchell, Clinton, Ont., for Ontario, and Mr. Samuel Ashfield of Winnipeg Man., for Manitoba and the North-West; therefore, orders for straight or mixed cars sent through the above agents or direct to us will have equally prompt and careful attention.

Shingle Mill, Hastings, B. C.; Lumber and Shingle Mill, Vancouver, B. C.; Shingle Mill, New Whatcom, Wash.; Shingle Mill, Sumas, Wash.; Shingle Mill, Carroll Siding, Wash.
