Phosphorus is an important constituent of the animal economy, particularly of the brain and nervous system, and is regarded as a valuable remedy for the following diseases, such as,

## LAPSE OF MEMORY, SOFTENING OF THE BRAIN, LOSS OF NERVE POWER, PHTHISIS, PARALYSIS, IMPO-TENCY, CONSUMPTION AND NEURALGIA.

The pilular form has been deemed the most desirable for the administration of Phosphorus. It is in a perfect state of subdivision, as it is incorporated with the material while in solution, and is not extinguished by oxidation.

This method of preparing Phosphorus has been discovered and brought to perfection by us, and is thus presented in its elementary state, free from repulsive qualities, which have so long militated against the use of this potent and valuable remedy. This is a matter requiring the notice of the physician, and under all circumstances the administration of Phosphorus should be guarded with the greatest care.

## Phosphorus as a Remedy for Neuralgia.

The following table is taken from a valuable paper, contributed to the "*London Practitioner*" by Prof. J. Ashburton Thompson, on the use of Phosphorus for the above-named complaint, large doses being employed by him, (the 1-25 gr. or more) and with marvelous success. He records 18 cases, as will be seen by table below, and arranges them in three classes—Acute Primary Attacks, Acute Recurrent Attacks and Chronic cases. Six cases occur in each class. In the first class the ages ranged between 25 and 46; in the second between 30 and 40; in the third between 24 and 40.

Some of the patients suffered from Trigeminal, some from Cervico Occipital, some from Cervico Brachial Neuralgia, and one in the second class from Sciatica. All the cases in the first two classes were cured; of the third class three were cured, one of the patients having been afflicted 18 years, without a week's freedom from pain.

## PHOSPHORUS AS A NERVE TONIC.

Its use is supported by no less authority than Prof. Delpech, Prof. Fisher, of Berlin, Dr. Eames, (in the *Dublin Journal*), Dr. Burgess, and Dr. Hammond, of New York. The special treatment indicated in these cases is: 1st. Complete rest of mind, especially abstention from all occupations resembling that upon which the mind has been overworked; 2d. The encouragement of any new hobby or study not in itself painful, which the patient might select; 3d. Tranquillity to the senses, which expressly give in these cases incorrect impressions, putting only those objects before them calculated to soothe the mind; 4th. A very nourishing diet, especially of shell fish; 5th. The internal administration of phosphorus in pilular form, prepared by Wm. R. WARNER & Co.
