La plus grande usine du genre dans la Puissance.

MICHEL LEFEBVRE & CO.,

MONTREAL

Négociants Industriels.

Pour les cinq grands pays producteurs de charbon, il y a eu en 1896, une augmentation de 21 1/2 millions de tonnes comparativement à 1895. Les chiffres ci-dessous ne sont que provisoires.

La Belgique a produit 77,000 tonnes en moins, les autres pays ont une augmentation variant de 1 à 12 0/10, voici d'ailleurs les chiffres.

	En 1895	En 1896
Tonnes	Tonnes	Tonnes
Belgique.....	20,535,000	20,458,000
France.....	27,714,000	28,320,000
Allemagne.....	99,100,000	104,000,000
Angleterre.....	191,300,000	192,700,000
Etats-Unis.....	151,000,000	172,000,000
Totaux.....	489,649,000	517,178,000

La France a importé en sus de sa pro-

duction environ 9,000,000 tonnes. Il est probable que ce dernier chiffre diminuera car une impulsion plus grande sera donnée cette année même aux travaux des mines de charbon dans les bassins du nord et du centre où de nouveaux puits vont être ouverts.
On attribue à un commencement d'épuisement la diminution de production constatée l'an dernier en Belgique.
