commodated at a relatively small increased expenditure. In view of the conditions described there has been forced upon the city during the war a policy of restraint as to provision for large capital expenditures. The conservative policy adopted has in a large measure been responsible for maintaining the general credit of the city in a very satisfactory position. The period of re-adjustment from war conditions will continue with us for some time, and we believe that this policy will still require to be adhered to, and that only such expenditures as are absolutely essential to provide for renewed growth and to conserve our present investments should be undertaken.

In former reports we have dealt with the increasing difficulties arising from the problem of financing current requirements. The annual estimates include on one side all expenditures and on the other side credit is taken for receipts. The difference is the amount of the taxes levied. While the expenditures described are actual during the year, the receipts are not all necessarily collectable during the year; and some means must be available to finance in respect to receipts estimated but not actually received. In past years certain reserves of the city have been drawn on for the purpose. In addition to this there is the cash loss of 1914 on Street Railways amounting to \$116,000, for

which no levy was made; which loss was financed fro above mentioned reserves in anticipation of sales of property sufficient to repay the loss. We then discussed the policy of using property sales funds to finance Street Railway losses and will not refer to it further here. It is either necessary to provide a working capital to finance pending the realization of the assets (the receipts above referred to) or to create a surplus by an additional levy. The former alternative is the proper one, but the city has no legal authority to set up such a fund; the latter alternative has been frequently discussed but rejected in view of the already high taxes necessary to carry on the business from year to year during war times.

The financial statement for the ten months ending Octo-

ber 31, 1919, is as follows:		
Expenditu	re	Estimate for
	Actual	Year
	Ten Months	\$105,092.02
